03 THE SYSTEM

How it fits together

Four channels feed the traveller's booking. Lifecycle keeps everyone who joins. Corporate earns trust and capital. Internal runs underneath with one set of priorities and numbers. Everything is measured against one north star: **completed bookings × average booking value**.

Who hands what to whom

FROM	TO	WHAT MOVES
Supply	→ Consumer	New inventory and destinations to promote
Creator	→ Consumer	Content for ads, CRM and the app feed
Consumer	→ Destination & Merchant	Travellers and trip dates for in-trip offers
Consumer	→ Lifecycle	Guests after the trip
Supply / Creator	→ Lifecycle	Partners after go-live and onboarding
Destination & Merchant	→ Corporate	Tourism board partnerships to announce
All channels	→ Internal	Results, issues, decisions needed
Internal	→ All channels	Priorities, budgets, one set of numbers
Corporate	→ Internal	Staff briefed before any release

What drives the north star

New travellers booking	Consumer · Creator	CPI, 30-day conversion, blended CAC, creator bookings
Bookable inventory	Supply	Live listings, time to live, availability accuracy
Revenue per trip	Destination & Merchant	Redemption rate, ancillary revenue per trip
People who stay	Lifecycle	Repeat rate, 90-day retention, NPS
Trust, capital, speed	Corporate · Internal	Tier-1 coverage, investor meetings, action close rate

04 CUSTOMER LIFECYCLE • ADDED

The customer lifecycle

Nine stages from first seeing Vacario to recommending it. Each has a rule for when someone enters, so we can count them, and an owner who is responsible for moving them to the next stage.

The customer lifecycle loop • L1–L4 winning a customer (teal) • L5–L7 the trip (blue) • L8–L9 keeping them (violet) • dashed: the loop back and the at-risk path

STAGE	ENTERS WHEN	OUR JOB	OWNER	KPI
L1 Discover	Has seen Vacario at least once: an ad, a creator post, press, a friend's link.	Inspire with real destinations and stays, and earn the first visit.	Performance marketing	Reach, Cost per install (CPI)
L2 Explore	Visited the app or site, or installed the app, without an account.	Show relevant destinations fast and make signing up worth it.	Product + performance marketing	Sign-up rate
L3 Join	Created an account.	Learn what they want and help them to a first booking.	CRM lead	Opt-in rate, 30-day booking conversion, Activation rate
L4 First booking	Paid for a first booking.	Confirm instantly and remove every doubt.	Product + customer service	Blended CAC, Average booking value
L5 Prepare	Has a confirmed booking with a future check-in.	Prepare them well and add useful extras.	CRM lead	Ancillary revenue per trip
L6 Experience	Checked in.	Be useful during the trip and fix problems fast.	Customer service + destination partnerships	In-trip view rate, Redemption rate
L7 Review & share	Checked out in the last 30 days.	Collect the review, fix anything that went wrong, invite sharing and referral.	Community & social	Review rate, Referral share, NPS by audience
L8 Repeat	Two or more bookings in the last 12 months.	Make the next trip easy and rewarding.	CRM lead	12-month repeat rate, Loyalty share
L9 Advocate	Referred at least one friend who booked, or scored 9–10 on NPS and shared content.	Recognise, reward and give them reasons to keep sharing.	CRM lead + community	Referral share, NPS by audience

05 CUSTOMER LIFECYCLE · ADDED

The lifecycle at a glance

The same nine stages as a mind map: who is in each stage, what we tell them, and what we measure. Below: what happens when customers go quiet, and the rules every message follows.

When customers go quiet

At-risk	A member with no app visit in 60 days and no upcoming trip, or a customer with no booking in 9 months.	Personal offer or message within 7 days of the flag; ask what changed.
Lapsed	No booking in 18 months and no visit in 90 days, after two win-back attempts.	Move to a quarterly "what's new" message only, to protect deliverability and respect the customer.
Won back	An At-risk or Lapsed customer who books again.	Treat as Repeat; note what brought them back in the knowledge base.

Contact rules

Frequency	At most one marketing message a day per person, across all touchpoints; at most three marketing WhatsApp messages a week.
Quiet hours	No marketing messages between 9 pm and 9 am IST. Service messages (booking, safety) may go any time.
Consent first	WhatsApp, SMS and push marketing only to people who opted in for that touchpoint. Consent is recorded with time and wording.
Service beats sales	Nobody with an open complaint gets a marketing message until it is resolved.
One voice	Lifecycle owns the calendar of who gets what; other channels book slots in it instead of sending directly.
Language	English plus the traveller's chosen language (for example Telugu or Hindi) where templates exist.

06 CUSTOMER LIFECYCLE · ADDED

The customer journey

What one trip feels like from the traveller's side, and what we do at each stage. The dips in the curve are where pain points sit and where we must be at our best.

What makes each cycle work

Properties	Qualify on quality, location and documents before spending time; no listing goes live without a test booking; a first booking within 30 days is the real finish line.
Travel agencies	Only GST-registered agencies; training before selling; prepaid terms until payment is proven; tiers, fam trips and quarterly reviews keep good agents growing.
Enquiries	Acknowledge in 1 minute, talk in 15, quote in 2 hours with 2–3 options valid for 48 hours; a booked enquiry moves straight into the Prepare stage.

Benchmarks: Booking.com lets properties register and go live themselves (Vacario adds a named account manager); Expedia's TAAP gives agents their own platform with tiered commission; MakeMyTrip's Myra books by conversation in Indian languages.

CHANNEL 02

Supply Communications

Supply communications brings in the rooms and stays that travellers book. Without accurate inventory in the right places, no amount of marketing produces bookings. The audience is business owners, so the messages are about revenue, reliability and ease.

A B2B acquisition and relationship-management channel. Its messaging differs from consumer advertising: commission, reach, payout reliability and ease of listing.

FROM THE PLAN

Objectives: Build bookable inventory in the priority destinations · Shorten the time from first contact to live listing · Keep availability and pricing accurate so bookings do not fail

What we say

New demand

Travellers from across India looking for stays like yours.

“Fill your quiet weeks with guests who want exactly what you offer.”

Fair and fast

Clear commission, no hidden fees, payouts on the agreed date.

“Know what you earn, and get it on time.”

Easy

Listing help, channel-manager and API connections, one account manager.

“We set it up with you, and one person looks after you.”

The workflow, step by step

- 5

QA & go live — Check content, prices and policies **◆ Passed QA? No → back to onboarding**
Supply operations · QA within 2 days · gives: Live, bookable inventory
- 6

Keep it accurate — Monitor sync errors and stale calendars
Supply operations · Sync errors fixed same day · gives: Accurate availability and price

CHANNEL 03

Creator Communications

Creators reach travellers who trust them more than ads. The plan treats creators as part of Vacario’s distribution: each has a link and a code, earns from bookings, and supplies content Vacario reuses.

The creator is not only an advertising medium. Creators become part of the Vacario distribution system, with their own links, content and bookings.

FROM THE PLAN

Objectives: Build a creator network that drives bookings, not only reach · Keep content supply steady for the app feed and paid ads · Pay creators on results they can see

What we say

Earn

Commission on every booking you drive, plus fees and hosted trips.

“Your audience books, you earn.”

Stories

Stays and destinations worth filming, with the details sorted.

“We handle the trip. You tell the story.”

Grow

Tiers, ambassador deals and early access to launches.

“The best creators help shape where we go next.”

The workflow, step by step

- 1

Scout — Search by travel niche, region and language (Telugu, Hindi, Tamil, English)
Creator partnerships · Shortlist in first 2 weeks of quarter · gives: Shortlist by tier

14 CHANNEL 04 Destination & Merchant Communications

Most travel apps go quiet once the stay is booked. This channel keeps Vacario useful during the trip, with things to do, places to eat and offers nearby, and earns extra revenue from each trip.

Lets Vacario talk to the traveller through the whole trip, instead of disappearing once the stay or flight is booked.

FROM THE PLAN

Objectives: Stay in contact with the traveller through the whole trip · Add revenue per trip from experiences and local offers · Win tourism board co-marketing and sponsorship

What we say

Reach

Visitors already in your town, at the moment they are choosing what to do.

"Guests nearby, looking for tonight's plan."

Results

Every redemption counted and visible to you.

WORKFLOWS W1-W7 · ADDED

Cross-channel workflows

Seven workflows that cut across every channel and had no defined path in the plan. Each has one owner per step and a time limit; the full explainer draws each one as a swimlane.

WORKFLOW	WHY IT EXISTS	STEPS	KEY MEASURE
W1 Lead management & routing	The plan runs several lead flows at once: travellers who enquire, suppliers, creators, merchants, partners and investors.	Capture → Clean and match → Score and classify → Route to an owner → First response → Follow up → Convert or close → Report and learn ♦ Qualified?	Lead response time Median minutes (B2C) or hours (B2B) from capture to first reply
W2 Campaign launch	Campaigns cross channels: an offer needs creative, paid media, CRM, creators, sometimes suppliers and legal checks.	Brief → Plan channels → Make creative → Check and approve → Set up tracking → Launch and check → Optimise → Wrap up ♦ Approved?	Campaigns launched on time On-time launches ÷ campaigns planned × 100
W3 Referral programme	Referral bookings cost almost nothing in media and come with trust built in.	Ask at the right moment → Share → Friend joins → Friend travels → Check for abuse → Release credits → Thank and recognise ♦ Trip completed?	Invite rate Guests who shared a link ÷ guests invited × 100
W4 Reviews and user photos & videos (UGC)	Reviews build trust for the next traveller, show suppliers what to fix and supply content for the feed and ads.	Request → Check before publishing → Reply → Tell the supplier → Ask to reuse → Reuse ♦ 3 stars or fewer?	Review rate Reviews ÷ completed trips × 100
W5 Customer support & service recovery	The plan promises communication through the whole trip.	Contact → Log and sort → First response → Fix with the supplier → Make it right → Close and check → Stop it happening again ♦ Safety or stranded?	First response time Median minutes from contact to first human reply
W6 Consent & data privacy	CRM, WhatsApp, SMS and push only work with permission, and India's Digital Personal Data Protection Act, 2023 sets rules for collecting and using personal data.	Ask clearly → Record it → Use approved templates → Preference centre → Honour opt-outs → Handle data requests → Review and report	Opt-in rate Users opted in (per touchpoint) ÷ sign-ups × 100
W7 Promotions & offer approval	Discounts can buy bookings or simply give away margin.	Propose → Check the margin → Agree co-funding → Approve by limit → Build codes and terms → Launch and watch → Evaluate ♦ Within limit?	Promotion booking share Bookings using a promotion ÷ all bookings × 100
W8 Business trip	Corporate travellers need policy, approvals and GST invoices.	Request trip → Check policy → Approve exception → Book → Support the trip → Invoice and reconcile → Report and review	Policy compliance
W9 MICE event	Group events need contracts, deposits and cut-offs.	Enquire → Agree the brief → Propose → Contract and deposit → Contract suppliers → Plan and invite → Deliver → Reconcile and report → Rebook	Proposal win rate

Time limits worth remembering

Booking confirmation	Within 1 minute	Enquiry acknowledged	Within 1 minute
Hot lead first reply	15 minutes (working hours)	Support reply during a trip	15 minutes, 24/7

BENCHMARKS · ROLLOUT · GLOSSARY

Learn, launch, and the words we use

What we borrow from leading travel platforms

Discovery and planning MakeMyTrip	Offer planning and booking help on WhatsApp and in-app in Telugu, Hindi and English from launch; brief regional-language creators so discovery happens in the traveller’s own language.
Price transparency EaseMyTrip	Show all-in prices from the first screen; no fee appears for the first time at checkout.
Loyalty Booking.com · Expedia · MakeMyTrip	Keep tiers simple and based on trips, so occasional travellers can progress; points work like cash on the next booking; the top tier gets a priority help line.
Reviews Booking.com · Airbnb	Verified-stay reviews only; for homestays, two-way reviews with a 14-day double-blind window; partners may reply publicly; negative reviews trigger service recovery (W4, W5).
Service recovery Airbnb	A “Vacario Assurance” promise in the Trust pillar: a human reply in 15 minutes during a trip, a fix within 2 hours, otherwise a comparable stay or refund (W5).
Supplier quality Airbnb	A quarterly “Top Partner” badge with published criteria (proposed: 4.6+ rating, 98%+ availability accuracy, under 1% supplier cancellations, reply within 24 hours), rewarded with better placement.
Partner self-service Booking.com · Expedia Group	A partner portal plus a named account manager for every partner in the first year; the monthly statement is the key message of the Supply channel.
Business trips MakeMyTrip myBiz · Cleartrip · EaseMyTrip	Business-trip flow: policy check first, approvals only for exceptions, GST invoice per trip and a monthly statement, 24/7 desk.
MICE Yatra	Treat MICE as a planned line: start with small meetings and incentive trips delivered through Vacario’s supply partners, using the MICE lifecycle and its yes/no checkpoints.
