CONTENTS

How this document works

00	Channel map and handoffs	p. 3	03	Creator Communications	p. 20–25
00	KPI framework: one north star	p. 4	04	Destination & Merchant Communications	p. 26–31
00	Who owns what (RACI)	p. 5	05	Corporate Communications	p. 32–37
00	Operating rhythm	p. 6	06	Lifecycle Communications	p. 38–43
00	Reading the KPIs: terms and rules	p. 7	07	Internal Communications	p. 44–49
01	Consumer Communications	p. 8–13	07	Internal: streams, escalation and time zones	p. 50–51
02	Supply Communications	p. 14–19	–	KPI summary: all channels	p. 52

0 · EXPLAINED

Why the channel exists, how the workflow runs in plain words, a worked example that walks one person through every step, the rules, and where it usually breaks.

1 · WORKFLOW

Swimlane diagram. Each lane is a team; boxes are steps in order. Gold tags are decision points, and the orange line under a box says what happens on a “no”.

2 · STEP PLAN

Each step in detail: what happens, who owns it, what starts it, the time allowed (SLA), touchpoints and output.

3 · KPI SCORECARD

The stages the channel moves people through, the conversion measured between each, and every KPI with its formula, data source, frequency and owner.

4 · KPI FORMULAS

One card per KPI: what it tells you, the formula, a worked example with sample numbers, and how to read the result.

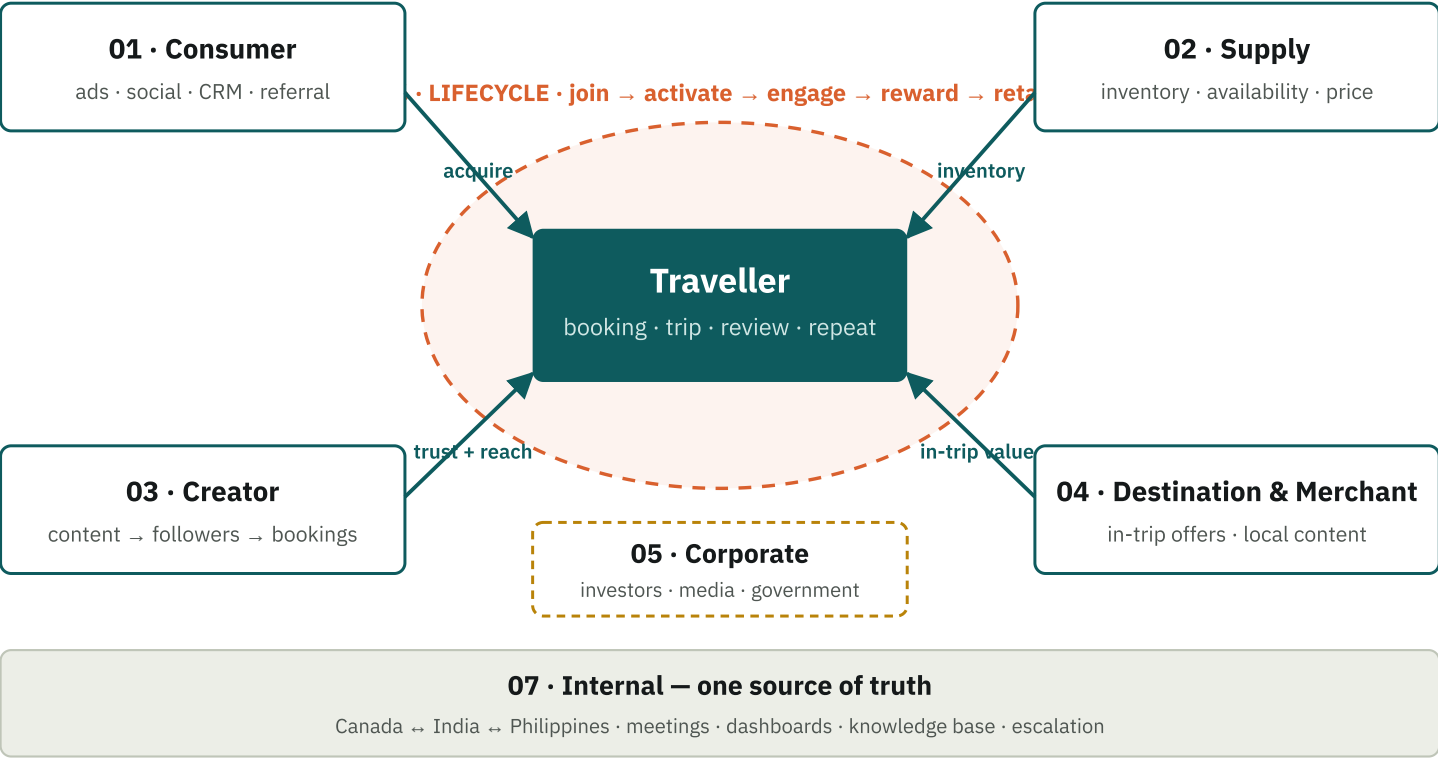

STATUS OF THIS DOCUMENT

Channel flows are quoted from the plan. Steps, owners, SLAs and KPIs are a proposed operating version. **Targets are left blank** for the team to set against the budget model.

00 · OVERVIEW

How the seven channels connect

Four channels feed the traveller's booking. Lifecycle loops around every audience after they join. Corporate earns trust and capital. Internal runs underneath all of it.

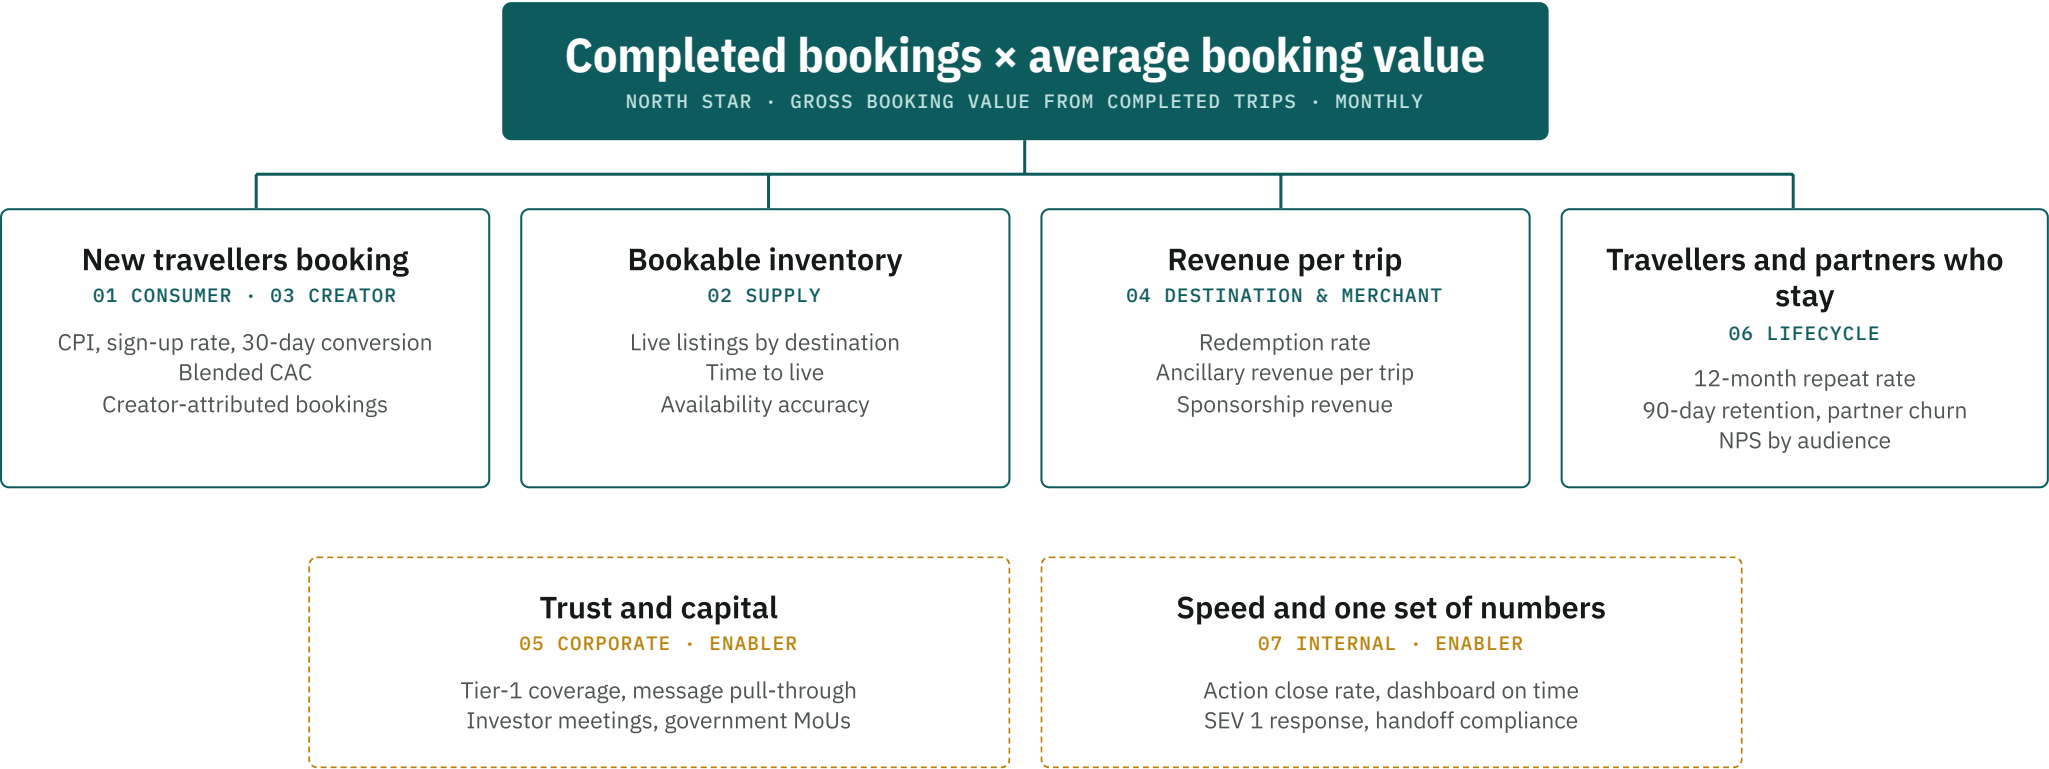

HANDOFFS BETWEEN CHANNELS

FROM	TO	WHAT MOVES
Supply	→ Consumer	New inventory and destinations to promote
Creator	→ Consumer	Content for ads, CRM and the app feed
Consumer	→ Destination & Merchant	Travellers and trip dates for in-trip offers
Consumer	→ Lifecycle	Guests after the trip
Supply / Creator	→ Lifecycle	Partners after go-live and onboarding
Destination & Merchant	→ Corporate	Tourism board partnerships to announce
All channels	→ Internal	Results, issues, decisions needed
Internal	→ All channels	Priorities, budgets, one set of numbers
Corporate	→ Internal	Staff briefed before any release

00 · KPI FRAMEWORK

One north star, seven channels feeding it

Every channel KPI in this document ladders up to one number the whole company can quote. Leading KPIs move first and are managed weekly; lagging KPIs confirm the result monthly or quarterly.

00 · OWNERSHIP

Who owns what

One accountable owner per channel. Responsible teams do the work; consulted teams are asked before; informed teams are told after.

CHANNEL	CEO & LEADERSHIP	MARKETING (PERFORMANCE + CRM)	COMMUNITY, SOCIAL & CONTENT	CREATOR PARTNERSHIPS	SUPPLY & BD	DESTINATION PARTNERSHIPS	COMMUNICATIONS	FINANCE & LEGAL	PRODUCT & TECH	CUSTOMER SERVICE & OPS
01 Consumer	I	A	R	C	C	C	I	C	R	R
02 Supply	I	C	I	I	A	C	I	R	R	C
03 Creator	I	C	R	A	C	I	I	R	I	I
04 Destination & Merchant	I	C	R	I	C	A	I	R	R	C
05 Corporate	A	C	I	I	C	C	R	R	I	I

00 • OPERATING RHYTHM

A standard week, and what each channel reviews when

TIME (IST)	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	FRIDAY
MORNING	Dashboard published	Ops check-in	Ops check-in	Ops check-in	Ops check-in
	Ops check-in	Marketing & social meeting	Supply pipeline review	Creator content & approvals	CRM send plan for next week
AFTERNOON	Weekly management review	Tech & product meeting	Finance & approvals	Destination offers review	Customer service & BD
6:00 PM	India → Canada handoff	India → Canada handoff	India → Canada handoff	India → Canada handoff	India → Canada handoff

CHANNEL	DAILY	WEEKLY	MONTHLY	QUARTERLY / SEASONAL
01 Consumer	Campaign pacing, CPI	CRM results, sign-up and opt-in rates	CAC, conversion, channel mix vs. budget	Repeat rate
02 Supply	Sync and parity exceptions	Pipeline, time to live	Partner statements, win rate	Top-partner reviews, satisfaction
03 Creator		Calendar, approvals, clicks	Attribution and payouts	Tier review, retention
04 Destination		Offer views, active offers	Redemptions, settlement	Seasonal refresh, renewals
05 Corporate			Investor update, coverage	Story review, MoUs
06 Lifecycle	Triggered messages	Activation, at-risk list	Value updates, NPS, retention	Churn and renewal review
07 Internal	Check-ins, handoffs	Management review, dashboard	Strategic review	SOP review

Terms, formula cards and the rules every KPI follows

GBV Gross booking value: the total value of bookings before costs, refunds excluded.	North star The one number the whole company steers by: completed bookings × average booking value.	CAC Customer acquisition cost: marketing spend ÷ new customers who booked.	CPI Cost per install: paid spend ÷ app installs from paid campaigns.
Cohort A group that joined in the same period, followed over time, e.g. everyone who signed up in October.	Attribution Linking a booking to what caused it: a campaign tag, a creator link or a code.	Conversion The share of people who move from one stage to the next, e.g. sign-up to first booking.	Median The middle value when sorted. Used for times so that one extreme case does not distort the result.
Leading KPI Moves first and can be changed this week, e.g. opt-in rate. Managed weekly.	Lagging KPI Confirms the result later, e.g. repeat rate. Reviewed monthly or quarterly.	NPS Net Promoter Score: % answering 9–10 minus % answering 0–6 to “How likely are you to recommend us?”.	Rate parity Vacario’s price for a stay is the same as or better than other sites.
SLA Service level: the time allowed for a step, e.g. reply within 15 minutes.	UGC User-generated content: photos, videos and reviews made by travellers.	Tier-1 media National business and travel outlets on an agreed, fixed list.	ASCI Advertising Standards Council of India, whose guidelines require paid creator posts to be clearly labelled.

HOW TO READ A FORMULA CARD

- **What it tells you:** the question the KPI answers.
- **Formula:** the top line is divided by the bottom line. “× 100” turns the result into a percentage.
- **Example:** sample numbers put through the formula to show the arithmetic. They are illustrations, not forecasts or targets.
- **How to read it:** what a good or bad result means, and the first thing to do about it.

RULES FOR EVERY KPI

- One owner and one data source per KPI, named on its card.
- Calculated the same way every time. Any change to a formula is logged in the knowledge base.
- Rates that follow people over time are measured by cohort (the month they joined).
- Periods are calendar months unless the card says otherwise. Money is in Indian rupees.
- Targets are set from the budget model and reviewed each quarter.

01

EXPLAINED

Consumer Communications

Paid advertising, earned media, creator content, social channels, CRM/email, WhatsApp/SMS, push notifications, referral programmes and loyalty communications.

TRAVELLERS

PROSPECTS

PAST GUESTS

WHY THIS CHANNEL EXISTS

Consumer communications is how Vacario finds travellers, turns them into bookers and brings them back. It spends most of the marketing budget, so every step has to show what it returns.

HOW THE WORKFLOW RUNS

Paid ads, press and creator content bring people to the app. From sign-up, CRM takes over: a welcome series learns what each person wants, and reminders bring back anyone who searched without booking. Once they book, messages switch from selling to helping: confirmation, trip preparation and support during the stay. After checkout the traveller is asked for a review and a referral, and after 30 days they move to Lifecycle, where the aim is the next booking.

WORKED EXAMPLE: ONE PASS THROUGH THE WORKFLOW

Priya in Hyderabad sees a Reel about a Coorg homestay and taps the link (1). She installs the app and picks “hills, family, under ₹8,000” in the welcome quiz (2). She searches but does not book; next day a WhatsApp reminder shows a price drop (3) and she books (4). A week before arrival she gets directions and a coffee-plantation tour offer (5). She messages support about a late check-in and gets a reply in minutes (6). After checkout she leaves a review and sends her referral link to her sister (7). A month later she gets Diwali trip ideas and books again (8).

Numbers in boxes are the steps on the workflow page that follows. People and places are illustrations.

HOW WE KNOW IT IS WORKING · FIRST FOUR KPIS, FULL FORMULA CARDS ON PAGES THAT FOLLOW

Cost per install (CPI) ↓

$\text{Paid media spend} \div \text{Installs from paid campaigns}$

Sign-up rate ↑

$\text{Sign-ups} \div \text{Installs} \times 100$

Opt-in rate ↑

$\text{Users opted into WhatsApp or push} \div \text{Sign-ups} \times 100$

30-day booking conversion ↑

$\text{First bookings within 30 days of sign-up} \div \text{Sign-ups in the same month (cohort)} \times 100$

RULES THAT KEEP IT WORKING

- ✓ Every campaign link carries tracking tags, so each booking can be traced to its source.
- ✓ No more than one marketing message a day per person across all touchpoints.
- ✓ WhatsApp and SMS go only to people who have opted in.
- ✓ Service messages (confirmation, trip details) always go out, even to people who opted out of marketing.

WHERE IT USUALLY BREAKS, AND WHAT TO DO

WARNING SIGN	WHAT TO DO
Installs rise but bookings do not	Check sign-up rate and 30-day conversion before adding ad spend.
Guests stop opening messages	Cut frequency and base content on the preference quiz, not generic deals.
Bad reviews after a stay	Send to Supply the same day; fix the property before promoting it again.

01

WORKFLOW

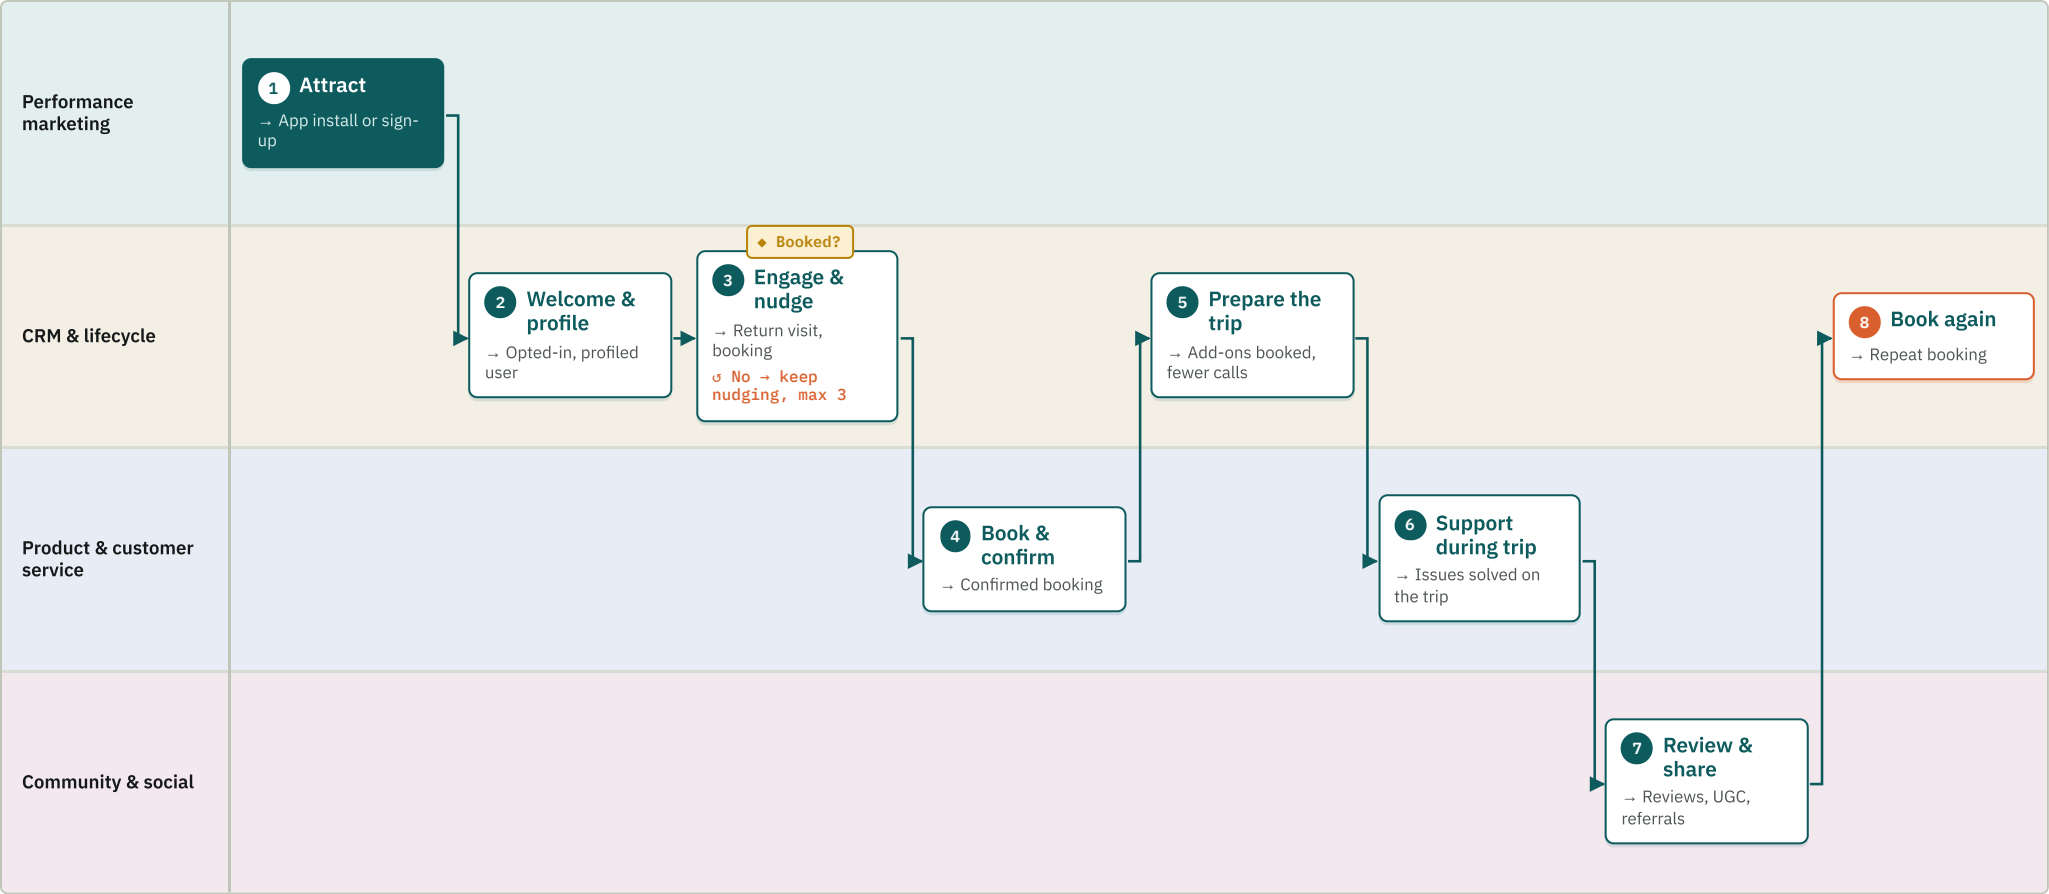

Consumer Communications

Paid advertising, earned media, creator content, social channels, CRM/email, WhatsApp/SMS, push notifications, referral programmes and loyalty communications.

TRAVELLERS

PROSPECTS

- Monthly: channel mix vs. budget model

HANDS OFF TO

- **Destination & Merchant:** in-trip offers during the stay
- **Lifecycle:** guests after the trip for loyalty and win-back

01

STEP PLAN

Consumer Communications

Paid advertising, earned media, creator content, social channels, CRM/email, WhatsApp/SMS, push notifications, referral programmes and loyalty communications.

TRAVELLERS

PROSPECTS

PAST GUESTS

STEP	WHAT HAPPENS	OWNER	STARTS WHEN	TIME ALLOWED	TOUCHPOINTS	OUTPUT
1	Attract - Set monthly spend by channel from the budget model - Run search, Meta, YouTube and app-install campaigns by destination - Point PR and creator content to tagged landing pages (UTM)	Performance marketing	Monthly media plan	Always on; pacing checked daily	Google, Meta, YouTube, PR, creator posts	App install or sign-up
2	Welcome & profile - Day 0 welcome email and push - Preference quiz: destinations, budget, travel group, language - Ask WhatsApp and push consent; day 3 first-booking offer	CRM & lifecycle	Sign-up	First message within 5 min	Email, push, WhatsApp, in-app	Opted-in, profiled user
3	Engage & nudge ♦ Booked? No → keep nudging, max 3 - Personal deals and destination content from profile - Abandoned search and cart reminders - Price-drop and festival alerts	CRM & lifecycle	Search or cart with no booking in 24 h	Nudge at 24 h, 72 h, 7 days	Push, WhatsApp, email, in-app feed	Return visit, booking
4	Book & confirm - One message with itinerary, GST invoice and support contact - Add trip to in-app wallet - Flag high-value bookings for a welcome call	Product & customer service	Payment success	Confirmation within 1 min	Email, WhatsApp, in-app	Confirmed booking
5	Prepare the trip - Check-in details, directions, weather - Offer experiences from Destination & Merchant - Packing and local tips content	CRM & lifecycle	7 days and 1 day before arrival	T-7 and T-1	Push, WhatsApp, email	Add-ons booked, fewer calls
6	Support during trip - Live WhatsApp and in-app chat - Hand in-trip offers to Destination & Merchant - Log every issue for supplier follow-up	Product & customer service	Check-in date	Reply within 15 min, 24/7	WhatsApp, in-app chat, phone	Issues solved on the trip
7	Review & share - Rating and review request - Invite photos and short video for the in-app feed - Send referral link with credit for both sides	Community & social	1 day after checkout	Reply to reviews within 48 h	Push, email, in-app, social	Reviews, UGC, referrals
8	Book again - Credit loyalty points - Next-trip ideas from past trip - Festival and long-weekend offers	CRM & lifecycle	Review received or 30 days after trip	Hand to Lifecycle at T+30	Email, push, WhatsApp	Repeat booking

KPI SCORECARD

12-month repeat rate	$\text{Customers with 2+ bookings in 12 months} \div \text{Customers who booked in the same 12 months} \times 100$	Booking system	Quarterly	CRM	Lagging	↑	-----

OBJECTIVES

- Grow app users and first bookings at a falling cost per booking
- Turn every trip into a review and a piece of content
- Make repeat and referral bookings a growing share of the total

REVIEW

- Daily: paid campaign pacing
- Weekly: CRM send plan and results
- Monthly: channel mix vs. budget model

Set each target from the budget model before launch, then review it each quarter.

01

KPI FORMULAS · 1 OF 2 Consumer Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Cost per install (CPI)

Leading ↓

What one app install from paid ads costs. The first check on whether ad money is buying people at a sensible price.

FORMULA

$$\frac{\text{Paid media spend}}{\text{Installs from paid campaigns}}$$

EXAMPLE

$$\frac{₹1,50,000}{3,000} = ₹50$$

HOW TO READ IT

Compare by channel and destination weekly. Move budget away from the highest-CPI campaigns unless their installs convert to bookings better.

Ad platforms, attribution tool · Weekly · Performance marketing

Sign-up rate

Leading ↑

The share of people who install the app and then create an account. A low rate means onboarding asks too much too early.

FORMULA

$$\frac{\text{Sign-ups}}{\text{Installs}} \times 100$$

EXAMPLE

$$\frac{1,800}{3,000} \times 100 = 60\%$$

HOW TO READ IT

If it drops right after an app release, check the sign-up screens first.

App analytics · Weekly · Product

Opt-in rate

Leading ↑

The share of new users who allow WhatsApp or push messages. Without opt-in, the CRM steps cannot reach them.

FORMULA

$$\frac{\text{Users opted into WhatsApp or push}}{\text{Sign-ups}} \times 100$$

EXAMPLE

$$\frac{1,080}{1,800} \times 100 = 60\%$$

HOW TO READ IT

Ask at a moment of value (a price alert, a saved trip), not on first launch.

CRM platform · Weekly · CRM

30-day booking conversion

Leading ↑

Of the people who signed up in a month, how many booked within 30 days. The main test of whether the Welcome and Engage steps work.

FORMULA

$$\frac{\text{First bookings within 30 days of sign-up}}{\text{Sign-ups in the same month (cohort)}} \times 100$$

EXAMPLE

$$\frac{90}{1,800} \times 100 = 5\%$$

HOW TO READ IT

Measure by sign-up month, so a late booking counts against the month the person joined.

Booking system · Monthly · CRM

Blended CAC

Lagging ↓

The full cost to win one paying customer: all marketing spend, including creators and content, divided by new customers. The same measure as cost per booking in the budget engine.

FORMULA

$$\frac{\text{Total marketing spend}}{\text{New booking customers}}$$

EXAMPLE

$$\frac{₹6,00,000}{400} = ₹1,500$$

HOW TO READ IT

CAC must be earned back by the first or second booking. Compare it with contribution per booking every month.

Finance + booking system · Monthly · Marketing lead

Average booking value

Lagging ↑

The average value of one booking. Multiplied by completed bookings it gives the north star.

FORMULA

$$\frac{\text{Gross booking value (GBV)}}{\text{Number of bookings}}$$

EXAMPLE

$$\frac{₹54,00,000}{600} = ₹9,000$$

HOW TO READ IT

Rising value with steady conversion is healthy. Rising value with falling bookings can mean prices are too high.

Booking system · Monthly · Marketing lead

01

KPI FORMULAS · 2 OF 2

Consumer Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Review rate

Leading ↑

The share of completed trips that leave a review. Reviews build trust for the next traveller and supply content for the feed.

FORMULA

$$\frac{\text{Reviews received}}{\text{Completed trips}} \times 100$$

EXAMPLE

$$\frac{150}{500} \times 100 = 30\%$$

HOW TO READ IT

Ask one day after checkout and make it one tap. Reply to every review within 48 hours.

App, review platform · Monthly · Community & social

Referral share

Lagging ↑

How much of the business comes from guests recommending Vacario. Referral bookings have almost no media cost.

FORMULA

$$\frac{\text{Bookings from referral links or credits}}{\text{All bookings}} \times 100$$

EXAMPLE

$$\frac{60}{600} \times 100 = 10\%$$

HOW TO READ IT

If it is flat, test a bigger or two-sided referral credit and send the link at the happiest moment, right after a good review.

Referral tracking · Monthly · CRM

12-month repeat rate

Lagging ↑

The share of customers who booked two or more times in the last 12 months. The cheapest booking is from a past guest.

FORMULA

$$\frac{\text{Customers with 2+ bookings in 12 months}}{\text{Customers who booked in the same 12 months}} \times 100$$

EXAMPLE

$$\frac{240}{1,600} \times 100 = 15\%$$

HOW TO READ IT

Look at it by first destination and first channel to see which travellers come back.

Booking system · Quarterly · CRM

02

EXPLAINED

Supply Communications

A B2B acquisition and relationship-management channel. Its messaging differs from consumer advertising: commission, reach, payout reliability and ease of listing.

- PROPERTY OWNERS
- PROPERTY MANAGERS
- HOTELS
- TRAVEL SUPPLIERS

WHY THIS CHANNEL EXISTS

Supply communications brings in the rooms and stays that travellers book. Without accurate inventory in the right places, no amount of marketing produces bookings. The audience is business owners, so the messages are about revenue, reliability and ease.

HOW THE WORKFLOW RUNS

Each month the supply lead compares what travellers search for with what Vacario can sell and names the gaps. Business development contacts suitable owners, hotels and managers and qualifies them. Finance and legal agree terms and sign. Supply operations builds and checks the listing, makes a test booking and switches it on. From then on, operations keeps prices and availability accurate every day, and an account manager sends monthly results and meets the best partners each quarter to add more inventory.

WORKED EXAMPLE: ONE PASS THROUGH THE WORKFLOW

Search data shows many travellers looking for Munnar tea-estate stays but few listings (1). BD calls ten estates and qualifies four (2). Three sign on the standard commission, with GST documents collected (3). Operations photographs one estate, connects its channel manager and loads rates (4), then makes a test booking before switching it on (5). A sync error one weekend is fixed the same day (6). At month end the owner gets a statement showing 14 bookings and agrees to list a second cottage (7).

Numbers in boxes are the steps on the workflow page that follows. People and places are illustrations.

HOW WE KNOW IT IS WORKING · FIRST FOUR KPIS, FULL FORMULA CARDS ON PAGES THAT FOLLOW

Pipeline coverage ↑

Qualified leads in the pipeline ÷ Monthly signing target

Win rate ↑

Suppliers signed ÷ Qualified leads × 100

Time to live ↓

Median of (go-live date – contract date) for listings that went live this period

Live listings by destination ↑

Count of listings that are live and bookable, per priority destination

RULES THAT KEEP IT WORKING

- ✓ No listing goes live without a successful test booking.
- ✓ Every partner has one named account manager.
- ✓ Payouts are made on the agreed date, every time.
- ✓ Rate parity is checked every week.

WHERE IT USUALLY BREAKS, AND WHAT TO DO

WARNING SIGN	WHAT TO DO
Signed partners take weeks to go live	Track time to live per listing; chase anything over 14 days.
Bookings fail because rooms are not really free	Move the partner to a channel manager or API and watch sync errors daily.
Partners go quiet after signing	Send the first monthly statement even with zero bookings, with a plan to change that.

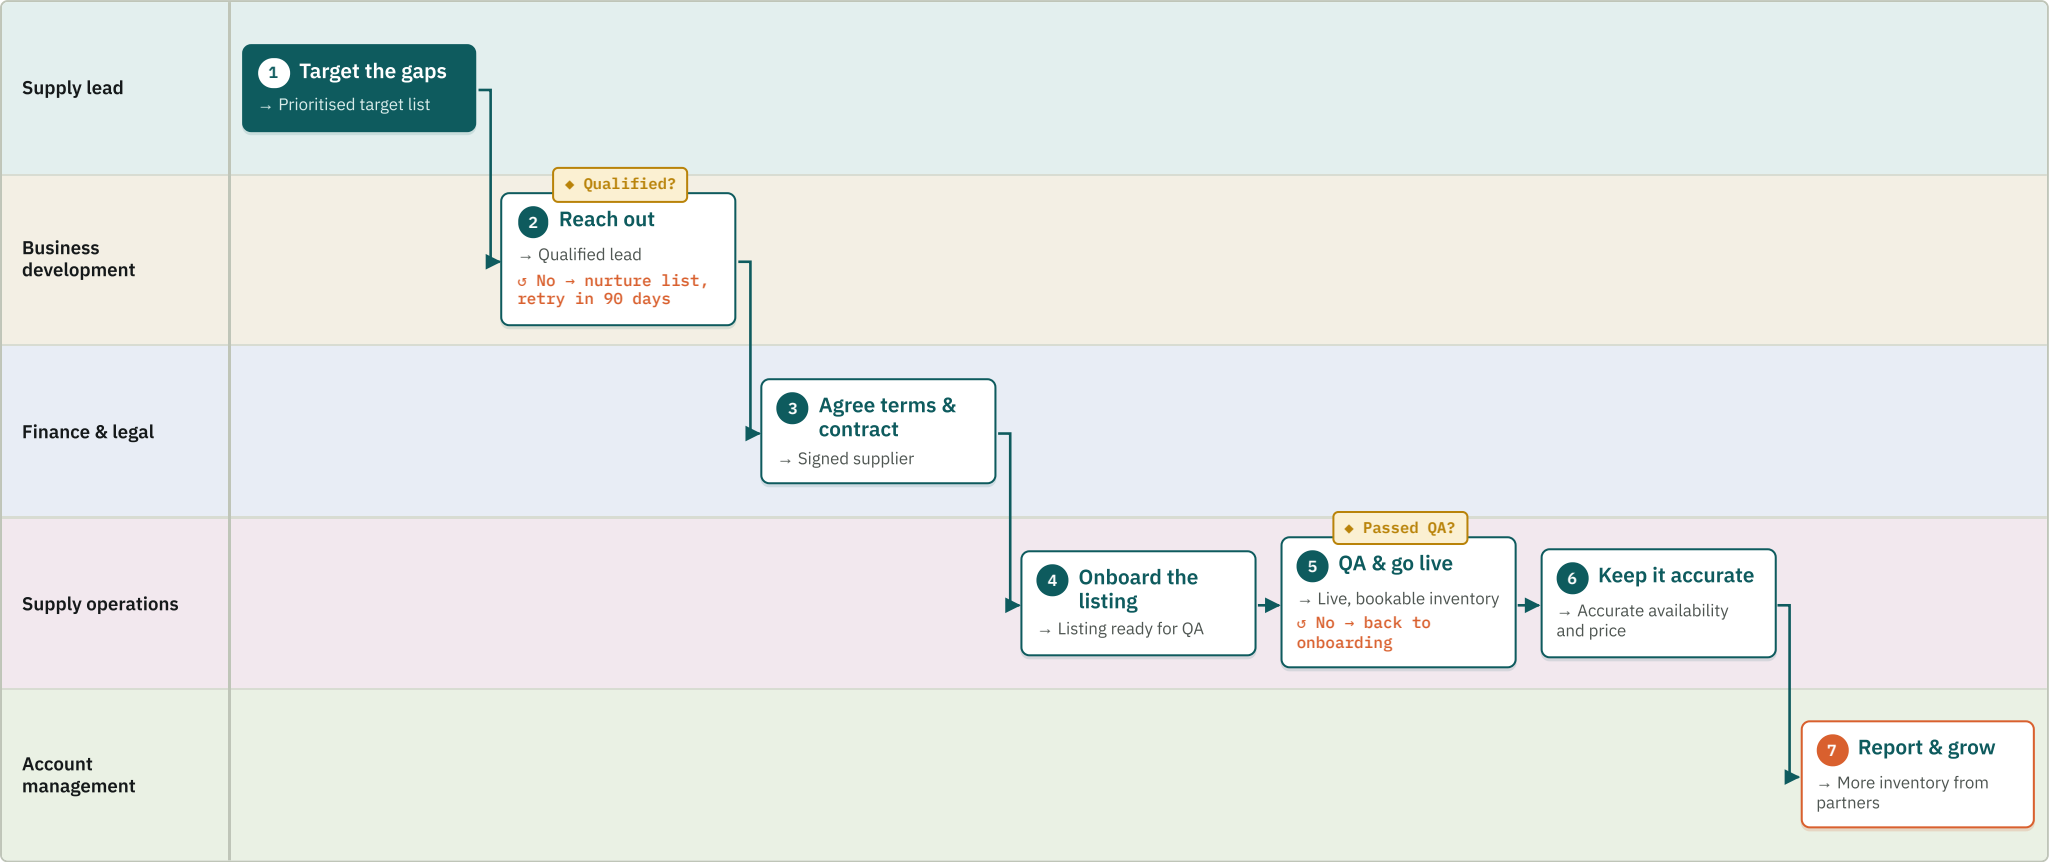

02

WORKFLOW
Supply Communications

A B2B acquisition and relationship-management channel. Its messaging differs from consumer advertising: commission, reach, payout reliability and ease of listing.

- PROPERTY OWNERS
- PROPERTY MANAGERS
- HOTELS
- TRAVEL SUPPLIERS

FLOW IN PLAN

INPUTS FROM

- Consumer: search demand and destination interest
- Destination & Merchant: local introductions

CADENCE

- Daily: sync and parity exceptions
- Weekly: pipeline review
- Monthly: partner statements
- Quarterly: top-partner reviews

HANDS OFF TO

- Consumer: new inventory for campaigns
- Internal: contract and inventory status in supply updates
- Lifecycle: suppliers after go-live

02

STEP PLAN

Supply Communications

A B2B acquisition and relationship-management channel. Its messaging differs from consumer advertising: commission, reach, payout reliability and ease of listing.

PROPERTY OWNERS

PROPERTY MANAGERS

HOTELS

TRAVEL SUPPLIERS

STEP	WHAT HAPPENS	OWNER	STARTS WHEN	TIME ALLOWED	TOUCHPOINTS	OUTPUT
1	Target the gaps - Compare search demand with live inventory by destination - Rank property types and price bands with gaps - Set monthly signing targets per destination	Supply lead	Monthly demand review	List ready by day 5 of month	Search data, market research	Prioritised target list
2	Reach out ♦ Qualified? No → nurture list, retry in 90 days - Pitch: new Indian demand, commission, payout speed, marketing support - Calls, email, LinkedIn, hotel associations, trade fairs - Qualify on quality, location, API or channel manager	Business development	Target list approved	First contact within 5 working days	Phone, email, LinkedIn, events	Qualified lead
3	Agree terms & contract - Commission, cancellation policy, rate parity - Collect registration, PAN and GST documents - E-sign agreement, set payout details	Finance & legal	Partner agrees in principle	Contract in 10 working days	Proposal, e-signature	Signed supplier
4	Onboard the listing - Photos, descriptions, amenities - Connect channel manager or API - Load rates, availability and policies	Supply operations	Contract signed	Listing built in 7 days	Onboarding call, partner portal, API	Listing ready for QA
5	QA & go live ♦ Passed QA? No → back to onboarding - Check content, prices and policies - Make a test booking end to end - Switch on and announce to marketing	Supply operations	Listing complete	QA within 2 days	QA checklist	Live, bookable inventory
6	Keep it accurate - Monitor sync errors and stale calendars - Check rate parity against other sites - Invite partners into seasonal promotions	Supply operations	Daily sync report	Sync errors fixed same day	Partner portal, email, WhatsApp	Accurate availability and price
7	Report & grow - Monthly performance statement per partner - Quarterly review with top partners - Ask for more rooms, dates and properties	Account management	Month end, quarter end	Statement by day 5; QBR each quarter	Statement, review meeting	More inventory from partners

KPI SCORECARD

Supply Communications

A B2B acquisition and relationship-management channel. Its messaging differs from consumer advertising: commission, reach, payout reliability and ease of listing.

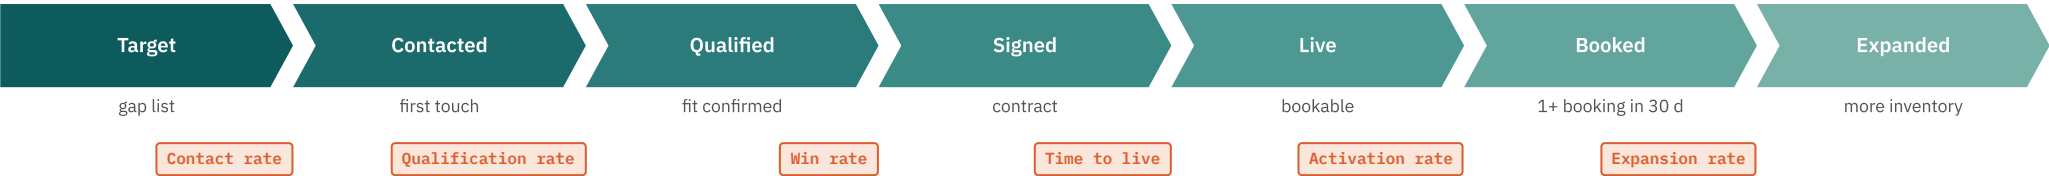

PROPERTY OWNERS

PROPERTY MANAGERS

HOTELS

TRAVEL SUPPLIERS

STAGES MEASURED, WITH THE CONVERSION KPI BETWEEN EACH

KPI	DEFINITION AND FORMULA	SOURCE	FREQUENCY	OWNER	TYPE	GOOD	TARGET
Pipeline coverage	Qualified leads in the pipeline ÷ Monthly signing target	CRM pipeline	Weekly	Business development	Leading	↑	-----
Win rate	Suppliers signed ÷ Qualified leads × 100	CRM pipeline	Monthly	Business development	Leading	↑	-----
Time to live	Median of (go-live date – contract date) for listings that went live this period	Onboarding tracker	Weekly	Supply operations	Leading	↓	-----
Live listings by destination	Count of listings that are live and bookable, per priority destination	Inventory system	Weekly	Supply lead	Lagging	↑	-----
Availability accuracy	(1 – Bookings that failed on availability or price ÷ Bookings attempted) × 100	Booking system	Daily	Supply operations	Leading	↑	-----
Supplier cancellation rate	Bookings cancelled by the supplier ÷ All bookings × 100	Booking system	Monthly	Account management	Lagging	↓	-----
Rate parity	Listings at parity or better ÷ Listings checked × 100	Parity check	Weekly	Supply operations	Leading	↑	-----
Bookings per live listing	Bookings in the month ÷ Live listings	Booking system	Monthly	Supply lead	Lagging	↑	-----
Supplier satisfaction	Sum of scores ÷ number of responses (scale 1–10)	Survey	Quarterly	Account management	Lagging	↑	-----

OBJECTIVES

- Build bookable inventory in the priority destinations
- Shorten the time from first contact to live listing
- Keep availability and pricing accurate so bookings do not fail

REVIEW

- Daily: sync and parity exceptions
- Weekly: pipeline review
- Monthly: partner statements
- Quarterly: top-partner reviews

Set each target from the budget model before launch, then review it each quarter.

02

KPI FORMULAS · 1 OF 2 Supply Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Pipeline coverage

Leading ↑

Whether there are enough good leads to hit next month's signing target.

FORMULA

$$\frac{\text{Qualified leads in the pipeline}}{\text{Monthly signing target}}$$

EXAMPLE

$$\frac{90}{30} = 3.0\times$$

HOW TO READ IT

Below 3× means outreach must increase now. Signings follow outreach by four to six weeks.

CRM pipeline · Weekly · Business development

Win rate

Leading ↑

The share of qualified leads that sign. Shows whether the pitch and terms work.

FORMULA

$$\frac{\text{Suppliers signed}}{\text{Qualified leads}} \times 100$$

EXAMPLE

$$\frac{27}{90} \times 100 = 30\%$$

HOW TO READ IT

Log why deals are lost. Recurring reasons (commission, payout speed) point to the fix.

CRM pipeline · Monthly · Business development

Time to live

Leading ↓

How long it takes from a signed contract to a bookable listing. Every day in between is inventory Vacario paid to win but cannot sell.

FORMULA

$$\text{Median of (go-live date - contract date) for listings that went live this period}$$

EXAMPLE

Five listings went live after 6, 8, 9, 12 and 20 days → median = 9 days

HOW TO READ IT

Use the median so one slow listing does not hide the normal case. Chase anything over 14 days.

Onboarding tracker · Weekly · Supply operations

Live listings by destination

Lagging ↑

How much bookable inventory there is in each priority destination.

FORMULA

Count of listings that are live and bookable, per priority destination

EXAMPLE

Goa 120 · Jaipur 85 · Munnar 40 → 245 live listings in three destinations

HOW TO READ IT

Compare with search demand per destination; that gap sets next month's target list.

Inventory system · Weekly · Supply lead

Availability accuracy

Leading ↑

How often a booking goes through at the shown price and availability. Failed bookings lose the traveller and hurt trust.

FORMULA

$$\left(1 - \frac{\text{Bookings that failed on availability or price}}{\text{Bookings attempted}}\right) \times 100$$

EXAMPLE

$$\left(1 - \frac{12}{800}\right) \times 100 = 98.5\%$$

HOW TO READ IT

Anything under 98% needs a partner-by-partner look; most failures come from a few partners without a channel manager.

Booking system · Daily · Supply operations

Supplier cancellation rate

Lagging ↓

The share of bookings a supplier cancels. Each one strands a traveller and costs a rebooking.

FORMULA

$$\frac{\text{Bookings cancelled by the supplier}}{\text{All bookings}} \times 100$$

EXAMPLE

$$\frac{8}{800} \times 100 = 1\%$$

HOW TO READ IT

Repeat offenders get a warning, then fewer placements, then removal.

Booking system · Monthly · Account management

02

KPI FORMULAS · 2 OF 2

Supply Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Rate parity

Leading ↑

Whether Vacario shows the same or better price than other sites for the same stay.

FORMULA

$$\frac{\text{Listings at parity or better}}{\text{Listings checked}} \times 100$$

EXAMPLE

$$\frac{188}{200} \times 100 = 94\%$$

HOW TO READ IT

Raise gaps with the partner the same week; travellers who find a lower price elsewhere rarely come back.

Parity check · Weekly · Supply operations

Bookings per live listing

Lagging ↑

How productive the average listing is. Shows whether new inventory is in places travellers want.

FORMULA

$$\frac{\text{Bookings in the month}}{\text{Live listings}}$$

EXAMPLE

$$\frac{800}{400} = 2.0 \text{ bookings per listing}$$

HOW TO READ IT

Listings with no bookings in 60 days need better content or promotion, or should be dropped.

Booking system · Monthly · Supply lead

Supplier satisfaction

Lagging ↑

How happy partners are with Vacario, from a short quarterly survey.

FORMULA

$$\text{Sum of scores} \div \text{number of responses (scale 1-10)}$$

EXAMPLE

40 partners answer; their scores add up to 324 →

$$324 \div 40 = 8.1$$

HOW TO READ IT

Read the comments from anyone scoring 6 or lower and call them within a week.

Survey · Quarterly · Account management

03

EXPLAINED

Creator Communications

The creator is not only an advertising medium. Creators become part of the Vacario distribution system, with their own links, content and bookings.

INFLUENCERS CREATORS CAMPUS AMBASSADORS

WHY THIS CHANNEL EXISTS

Creators reach travellers who trust them more than ads. The plan treats creators as part of Vacario’s distribution: each has a link and a code, earns from bookings, and supplies content Vacario reuses.

HOW THE WORKFLOW RUNS

Each quarter the team finds creators who match target travellers by niche, region and language, and invites the best into the programme on one of three tiers. Onboarding gives them a kit, a tracking link and code, and the disclosure rules. For a campaign, the content lead briefs the trip and books the stay through Supply. Drafts are checked before posting. Social reshares the posts and boosts the best as paid ads. Finance pays monthly from the attribution report, and the strongest creators move to long-term ambassador deals.

WORKED EXAMPLE: ONE PASS THROUGH THE WORKFLOW

The team finds a Telugu travel creator with 80,000 engaged followers in Andhra Pradesh and Telangana (1) and signs her on the micro tier with commission per booking (2). She gets her link, the code VAC-ANU and the disclosure rules (3). The brief is a monsoon weekend in Araku Valley, booked through a supply partner (4). Her draft is approved in a day (5). The Reel posts, is reshared and boosted (6). Her code brings 22 bookings and she is paid on the 10th (7). After two strong quarters she becomes an ambassador (8).

Numbers in boxes are the steps on the workflow page that follows. People and places are illustrations.

HOW WE KNOW IT IS WORKING · FIRST FOUR KPIS, FULL FORMULA CARDS ON PAGES THAT FOLLOW

Active creators by tier ↑

Count of creators with at least one post in the last 30 days, by tier

On-time delivery ↑

Content delivered by the agreed date ÷ Content due × 100

Approval turnaround ↓

Median hours from draft received to approval

Engagement rate ↑

Likes + comments + saves + shares ÷ Reach (unique accounts that saw the post) × 100

RULES THAT KEEP IT WORKING

- ✓ Every paid or gifted post carries a clear disclosure label, in line with ASCI guidelines.
- ✓ Creators are paid on time from the monthly statement.
- ✓ Usage rights for paid ads are agreed before content is made.
- ✓ One review round only, so creators keep their own voice.

WHERE IT USUALLY BREAKS, AND WHAT TO DO

WARNING SIGN	WHAT TO DO
Big reach, no bookings	Judge creators on cost per attributed booking, not followers.
Content late or off-brief	Brief three weeks before travel; confirm deliverables in writing.
Posts missing the disclosure label	Do not approve until the label is present.

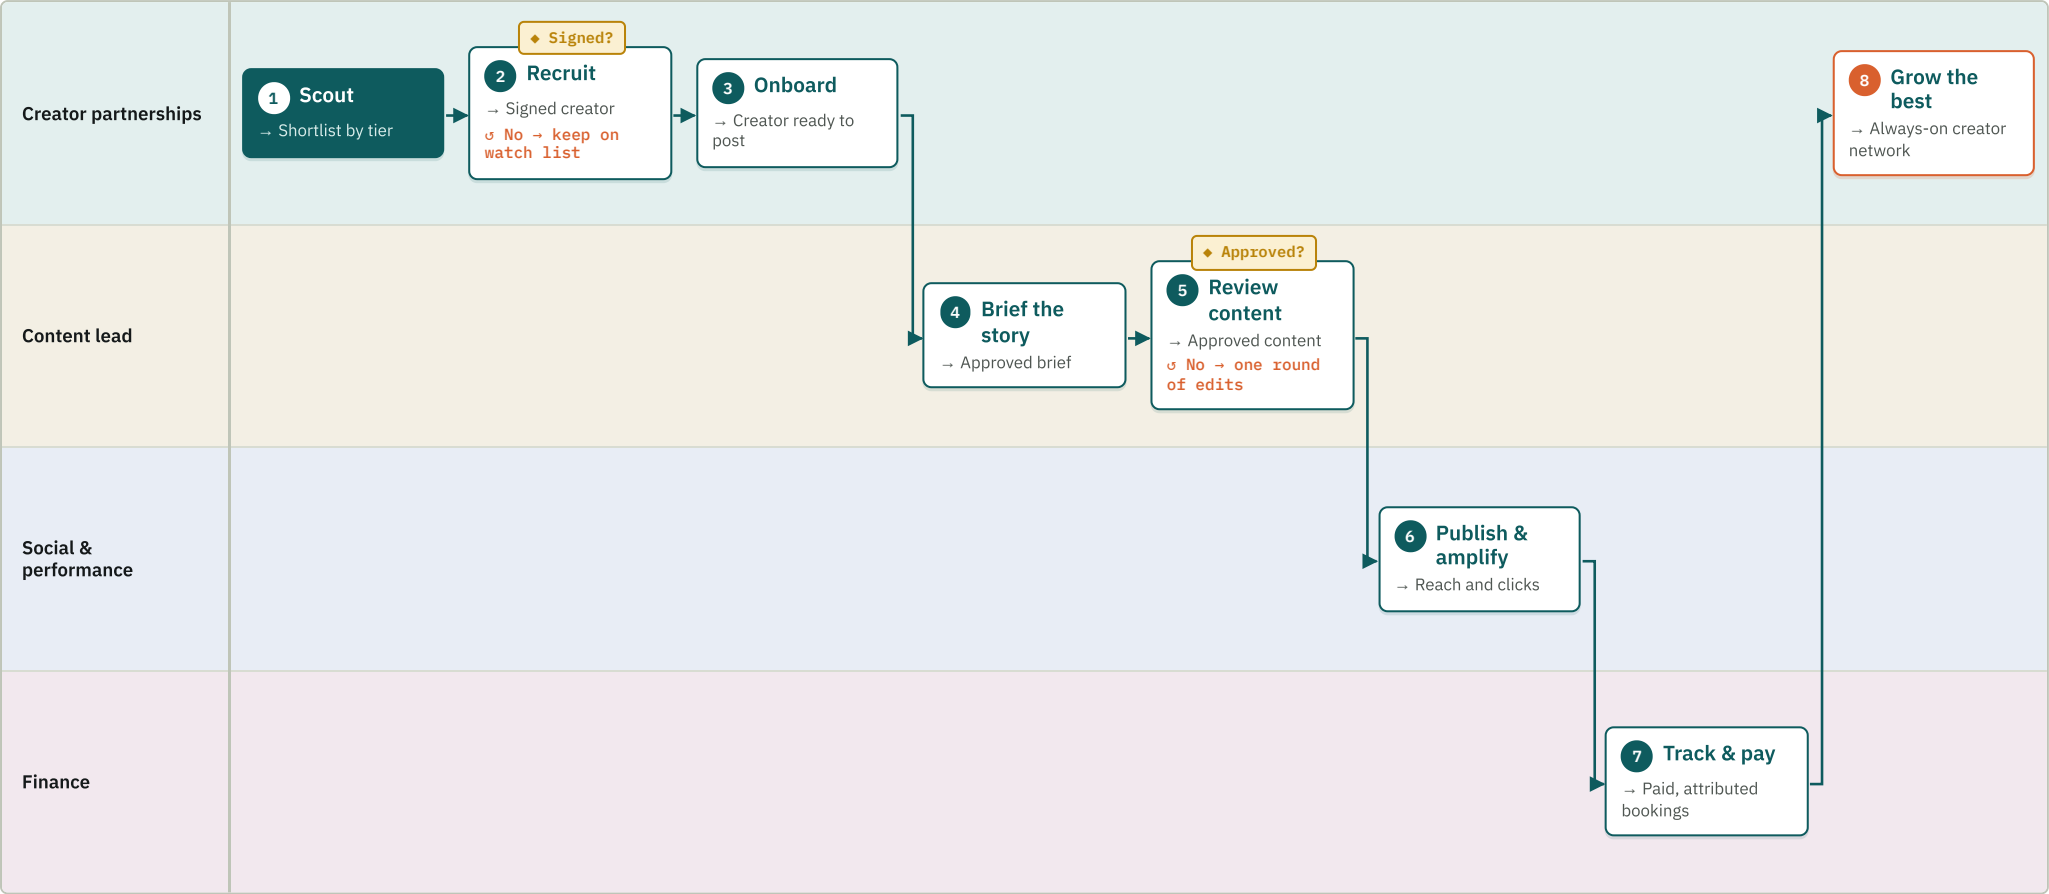

03

CREATORS

CAMPUS AMBASSADORS

STAGES MEASURED, WITH THE CONVERSION KPI BETWEEN EACH

KPI	DEFINITION AND FORMULA	SOURCE	FREQUENCY	OWNER	TYPE	GOOD	TARGET
Active creators by tier	Count of creators with at least one post in the last 30 days, by tier	Creator tracker	Monthly	Creator partnerships	Leading	↑	-----
On-time delivery	Content delivered by the agreed date ÷ Content due × 100	Content calendar	Monthly	Content lead	Leading	↑	-----
Approval turnaround	Median hours from draft received to approval	Review form	Weekly	Content lead	Leading	↓	-----
Engagement rate	Likes + comments + saves + shares ÷ Reach (unique accounts that saw the post) × 100	Platform insights	Per post	Social	Leading	↑	-----
Link clicks	Sum of clicks on all creator tracking links in the period	Link tracking	Weekly	Social	Leading	↑	-----
Attributed bookings	Bookings made through a creator link (within 30 days of the click) + bookings using a creator code	Booking system	Monthly	Creator partnerships	Lagging	↑	-----
Cost per attributed booking	Creator fees + commission + hosted trip costs ÷ Attributed bookings	Finance + booking system	Monthly	Creator partnerships	Lagging	↓	-----
Disclosure compliance	Paid or gifted posts with a correct label ÷ Paid or gifted posts × 100	Content review	Monthly	Content lead	Leading	=	-----
Creator retention	Creators active in both quarters ÷ Creators active last quarter × 100	Creator tracker	Quarterly	Creator partnerships	Lagging	↑	-----

OBJECTIVES

- Build a creator network that drives bookings, not only reach
- Keep content supply steady for the app feed and paid ads
- Pay creators on results they can see

REVIEW

- Weekly: content calendar and approvals
- Monthly: attribution and payouts
- Quarterly: tier review and scouting

Set each target from the budget model before launch, then review it each quarter.

03

KPI FORMULAS • 1 OF 2

Creator Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Active creators by tier

Leading ↑

How many creators are actually posting, by size of audience.

FORMULA

Count of creators with at least one post in the last 30 days, by tier

EXAMPLE

Nano 25 • Micro 12 • Macro 3 → **40 active creators**

HOW TO READ IT

A signed creator who never posts costs time; re-brief or drop after 45 quiet days.

Creator tracker • Monthly • Creator partnerships

On-time delivery

Leading ↑

The share of agreed content that arrives on the agreed date.

FORMULA

$$\frac{\text{Content delivered by the agreed date}}{\text{Content due}} \times 100$$

EXAMPLE

$\frac{54}{60} \times 100 = 90\%$

HOW TO READ IT

Late creators slip campaigns. Take it into account at the quarterly tier review.

Content calendar • Monthly • Content lead

Approval turnaround

Leading ↓

How fast Vacario approves creator drafts. Slow approvals delay posts and frustrate creators.

FORMULA

Median hours from draft received to approval

EXAMPLE

Drafts approved after 6, 20, 26, 30 and 50 hours
→ median = **26 hours**

HOW TO READ IT

The SLA is 48 hours. Anything slower points to too many reviewers.

Review form • Weekly • Content lead

Engagement rate

Leading ↑

How strongly a creator's audience reacts to a post. A better guide to influence than follower count.

FORMULA

$$\frac{\text{Likes + comments + saves + shares}}{\text{Reach (unique accounts that saw the post)}} \times 100$$

EXAMPLE

$\frac{4,200}{60,000} \times 100 = 7\%$

HOW TO READ IT

Compare creators of the same tier; saves and shares matter most for travel.

Platform insights • Per post • Social

Link clicks

Leading ↑

How many people went from creator content to Vacario.

FORMULA

Sum of clicks on all creator tracking links in the period

EXAMPLE

40 creators × 150 clicks on average → **6,000 clicks**

HOW TO READ IT

Clicks with no bookings usually mean the landing page does not match the post.

Link tracking • Weekly • Social

Attributed bookings

Lagging ↑

Bookings Vacario can trace to a creator through their link or code.

FORMULA

Bookings made through a creator link (within 30 days of the click) + bookings using a creator code

EXAMPLE

85 bookings by link + 35 by code → **120 attributed bookings**

HOW TO READ IT

This is what creators are paid on, so the rules (30-day window, code or link) must be written into every agreement.

Booking system • Monthly • Creator partnerships

03

KPI FORMULAS · 2 OF 2

Creator Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Cost per attributed booking

Lagging ↓

What it costs to get one booking through creators. The creator equivalent of CAC.

FORMULA

$$\frac{\text{Creator fees + commission + hosted trip costs}}{\text{Attributed bookings}}$$

EXAMPLE

$$\frac{₹3,60,000}{120} = ₹3,000$$

HOW TO READ IT

Compare with blended CAC. Creators above it need a new brief or a smaller fee.

Finance + booking system · Monthly · Creator partnerships

Disclosure compliance

Leading =

The share of paid or gifted posts with a correct disclosure label. Required under ASCI guidelines; the target is 100%.

FORMULA

$$\frac{\text{Paid or gifted posts with a correct label}}{\text{Paid or gifted posts}} \times 100$$

EXAMPLE

$$\frac{60}{60} \times 100 = 100\%$$

HOW TO READ IT

Anything below 100% is fixed the same day; ask the creator to edit the post.

Content review · Monthly · Content lead

Creator retention

Lagging ↑

How many creators who were active last quarter are still active this quarter.

FORMULA

$$\frac{\text{Creators active in both quarters}}{\text{Creators active last quarter}} \times 100$$

EXAMPLE

$$\frac{28}{40} \times 100 = 70\%$$

HOW TO READ IT

Late payment and slow approvals are the usual reasons creators leave.

Creator tracker · Quarterly · Creator partnerships

04

EXPLAINED

Destination & Merchant Communications

Lets Vacario talk to the traveller through the whole trip, instead of disappearing once the stay or flight is booked.

- TOURISM BOARDS
- ATTRACTIONS
- RESTAURANTS
- EXPERIENCES
- LOCAL MERCHANTS

WHY THIS CHANNEL EXISTS

Most travel apps go quiet once the stay is booked. This channel keeps Vacario useful during the trip, with things to do, places to eat and offers nearby, and earns extra revenue from each trip.

HOW THE WORKFLOW RUNS

For each priority destination the team maps the tourism board, attractions, restaurants and experience operators. Tourism boards are offered co-marketing and traveller insight; merchants are offered visitors who are already in town. Each offer has clear terms and a code or QR for redemption. Content builds guides and offer cards in the app. CRM puts offers in the pre-trip message and sends timely suggestions during the stay. Redemptions are recorded, partners are settled monthly and offers are refreshed before each season.

WORKED EXAMPLE: ONE PASS THROUGH THE WORKFLOW

Jaipur is a priority destination, so the team maps the tourism department, Amber Fort guides and ten restaurants (1). A food-walk operator and three restaurants agree to offers (2-3). Guides and offer cards go into the app (4). A family booked for November gets the food walk in their pre-trip message and a restaurant offer on arrival evening (5). They scan the QR at dinner (6). The restaurant is paid its commission on the 10th (7), and offers are refreshed for winter (8).

Numbers in boxes are the steps on the workflow page that follows. People and places are illustrations.

HOW WE KNOW IT IS WORKING · FIRST FOUR KPIS, FULL FORMULA CARDS ON PAGES THAT FOLLOW

Destination coverage ↑

Priority destinations with 5+ live partners ÷ Priority destinations × 100

Active offers ↑

Count of offers live in the app, per destination

In-trip view rate ↑

Travellers who viewed an offer ÷ Travellers in the destination × 100

Redemption rate ↑

Offer redemptions ÷ Travellers in the destination × 100

RULES THAT KEEP IT WORKING

- ✓ At most one in-trip offer message a day.
- ✓ Every offer has an end date and a redemption method before it goes live.
- ✓ Merchants see the same redemption count Vacario sees.
- ✓ Tourism boards get a report within two weeks of each campaign.

WHERE IT USUALLY BREAKS, AND WHAT TO DO

WARNING SIGN	WHAT TO DO
Offers go unused	Send them at the right moment (arrival day, near the place) and drop weak ones.
Merchants dispute numbers	Use QR redemption logged in real time and visible to both sides.
Stale offers after the season	Refresh six weeks before each season.

04

04

KPI FORMULAS • 1 OF 2

Destination & Merchant Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Destination coverage

Leading ↑

How many priority destinations have enough local partners to fill a trip with offers.

FORMULA

$$\frac{\text{Priority destinations with 5+ live partners}}{\text{Priority destinations}} \times 100$$

EXAMPLE

$$\frac{6}{10} \times 100 = 60\%$$

HOW TO READ IT

Work on the destinations with the most bookings and the fewest partners first.

Partner tracker • Monthly • Destination partnerships

Active offers

Leading ↑

How many offers a traveller can use in each destination.

FORMULA

Count of offers live in the app, per destination

EXAMPLE

Goa 18 • Jaipur 12 • Munnar 6 → 36 live offers

HOW TO READ IT

Aim for variety (food, activity, transport), not just volume.

App CMS • Weekly • Content

In-trip view rate

Leading ↑

The share of travellers in a destination who open at least one offer.

FORMULA

$$\frac{\text{Travellers who viewed an offer}}{\text{Travellers in the destination}} \times 100$$

EXAMPLE

$$\frac{330}{500} \times 100 = 66\%$$

HOW TO READ IT

Low views mean the timing or message is wrong, not the offers.

App analytics • Weekly • CRM

Redemption rate

Lagging ↑

The share of travellers in a destination who use an offer.

FORMULA

$$\frac{\text{Offer redemptions}}{\text{Travellers in the destination}} \times 100$$

EXAMPLE

$$\frac{110}{500} \times 100 = 22\%$$

HOW TO READ IT

High views with low redemptions mean the offer is weak or hard to use.

Redemption tool • Monthly • Destination partnerships

Ancillary revenue per trip

Lagging ↑

The extra revenue earned on each trip beyond the stay.

FORMULA

$$\frac{\text{Commission + experience revenue}}{\text{Completed trips}}$$

EXAMPLE

$$\frac{\text{₹2,75,000}}{500} = \text{₹550}$$

HOW TO READ IT

Add it to booking contribution when judging whether CAC is affordable.

Finance • Monthly • Destination partnerships

Settlement on time

Leading ↑

The share of partners paid by the 10th of the following month.

FORMULA

$$\frac{\text{Partners paid by day 10}}{\text{Partners due payment}} \times 100$$

EXAMPLE

$$\frac{38}{40} \times 100 = 95\%$$

HOW TO READ IT

Late payment is the fastest way to lose small merchants.

Finance • Monthly • Finance

04

KPI FORMULAS · 2 OF 2

Destination & Merchant Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Sponsorship revenue

Lagging ↑

Money from tourism boards and sponsors for campaigns and placement.

FORMULA

Sum of tourism board, co-marketing and sponsor fees recognised in the period

EXAMPLE

Two tourism board campaigns ₹4,00,000 + three sponsorships ₹1,50,000 → ₹5,50,000

HOW TO READ IT

Every sponsor gets a results report; renewal depends on it.

Finance · Quarterly · Destination partnerships

Partner renewal rate

Lagging ↑

The share of destination partners who renew for the next season.

FORMULA

Partners who renewed / Partners up for renewal × 100

EXAMPLE

34 / 40 × 100 = 85%

HOW TO READ IT

Look at redemptions for those who did not renew; poor results usually explain it.

Partner tracker · Seasonal · Destination partnerships

05

EXPLAINED

Corporate Communications

The message changes from “book your next trip” to the corporate story: what Vacario is building, growth, technology, partnerships, milestones and market expansion.

- INVESTORS
- MEDIA
- GOVERNMENTS
- STRATEGIC PARTNERS
- EMPLOYEES

WHY THIS CHANNEL EXISTS

Corporate communications tells the story of the company rather than the product: what Vacario is building, how fast it is growing, its technology and its partners. It builds the trust needed for funding, partnerships and government support.

HOW THE WORKFLOW RUNS

Leadership approves one message house every six months. Communications keeps a calendar of milestones and prepares a pack for each: press release, fact sheet, investor note, partner brief, internal note and Q&A. Finance checks the numbers, legal checks the claims and the CEO signs off. Employees are briefed first; then each audience hears the news through its own route on the same day. One spokesperson handles questions, and results are logged.

WORKED EXAMPLE: ONE PASS THROUGH THE WORKFLOW

Vacario signs a co-marketing agreement with a state tourism department, which fits the “India first” message (1). It goes on the calendar for the second week of the month (2). The pack is drafted (3); finance checks the numbers, legal approves the department’s name and the CEO signs off (4). Staff in Canada, India and the Philippines are briefed that morning (5). The release goes to media, investors and partners (6). The CEO takes two interview requests (7), and the coverage report is filed a week later (8).

Numbers in boxes are the steps on the workflow page that follows. People and places are illustrations.

HOW WE KNOW IT IS WORKING · FIRST FOUR KPIS, FULL FORMULA CARDS ON PAGES THAT FOLLOW

Milestones on schedule ↑

$$\frac{\text{Announcements made on the planned date}}{\text{Announcements planned}} \times 100$$

Media mentions ↑

$$\frac{\text{Count of articles, broadcasts and posts naming Vacario, from the coverage log}}{\text{Total mentions}} \times 100$$

Tier-1 coverage share ↑

$$\frac{\text{Mentions in tier-1 media}}{\text{All mentions}} \times 100$$

Message pull-through ↑

$$\frac{\text{Coverage carrying at least one key message}}{\text{All coverage}} \times 100$$

RULES THAT KEEP IT WORKING

- ✓ Employees hear news before anyone outside.
- ✓ Finance checks every number before release.
- ✓ Only the named spokesperson speaks to media.
- ✓ Partner names are used only with written approval.

WHERE IT USUALLY BREAKS, AND WHAT TO DO

WARNING SIGN	WHAT TO DO
Different people quote different numbers	The fact sheet is the only source; log every figure released.
Staff learn news from social media	Hold the release until the internal briefing has gone out.
Announcements bunch up or slip	Update the milestone calendar monthly; plan one major story a month.

05

Milestones on schedule

Leading ↑

Whether announcements go out on the planned date.

FORMULA

$$\frac{\text{Announcements made on the planned date}}{\text{Announcements planned}} \times 100$$

EXAMPLE

$$\frac{5}{6} \times 100 = 83.3\%$$

HOW TO READ IT

A slip is fine if planned; a missed date with no notice is not.

Milestone calendar · Monthly · Communications

Media mentions

Lagging ↑

How often Vacario appears in the media.

FORMULA

Count of articles, broadcasts and posts naming Vacario, from the coverage log

EXAMPLE

18 online + 4 print + 2 broadcast → 24 mentions

HOW TO READ IT

Read it with tier-1 share; volume alone can hide weak coverage.

Coverage log · Monthly · Communications

Tier-1 coverage share

Lagging ↑

The share of coverage in national business and travel media.

FORMULA

$$\frac{\text{Mentions in tier-1 media}}{\text{All mentions}} \times 100$$

EXAMPLE

$$\frac{6}{24} \times 100 = 25\%$$

HOW TO READ IT

Agree the tier-1 list once and keep it fixed so the number can be compared over time.

Coverage log · Monthly · Communications

Message pull-through

Lagging ↑

Whether coverage carries Vacario's own key messages.

FORMULA

$$\frac{\text{Coverage carrying at least one key message}}{\text{All coverage}} \times 100$$

EXAMPLE

$$\frac{18}{24} \times 100 = 75\%$$

HOW TO READ IT

Low pull-through means the messages are not quotable; rewrite them as short facts.

Coverage review · Per release · Communications

Investor update on time

Leading =

Whether investors get their update on the agreed date. Target 100%.

FORMULA

$$\frac{\text{Updates sent by the agreed date}}{\text{Updates due}} \times 100$$

EXAMPLE

$$\frac{3}{3} \times 100 = 100\%$$

HOW TO READ IT

Send on time even when the news is mixed; silence worries investors more.

Investor log · Monthly · CEO

Investor meetings

Lagging ↑

Interest the updates and releases create among investors.

FORMULA

Count of investor meetings or calls that came from an update or release

EXAMPLE

Two after the monthly update + three after a release → 5 meetings in the quarter

HOW TO READ IT

Note which update or story led to each meeting.

Investor log · Quarterly · CEO

05

KPI FORMULAS · 2 OF 2

Corporate Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Government and tourism MoUs

Lagging ↑

Formal partnerships with government and tourism bodies.

FORMULA

Count of MoUs or formal partnerships signed with government or tourism bodies

EXAMPLE

One state tourism MoU in the quarter → 1

HOW TO READ IT

Each MoU should lead to a campaign within six months, handled by Destination & Merchant.

Partnership log · Quarterly · CEO

Employees briefed first

Leading =

Whether staff heard the news before the public. Target 100%.

FORMULA

Releases with a staff briefing
beforehand
Releases × 100

EXAMPLE

4
4 × 100 = 100%

HOW TO READ IT

If it misses once, find out why before the next release.

Internal log · Per release · CEO

06

EXPLAINED

Lifecycle Communications

Directly tied to guest and partner retention. Communication should not stop once someone joins, spends, sells or sponsors. This is where Vacario should shine.

- GUESTS
- SUPPLIERS
- CREATORS
- MERCHANTS & SPONSORS

WHY THIS CHANNEL EXISTS

The plan says communication should not stop once somebody joins, spends, sells or sponsors. Keeping a guest or partner costs far less than finding a new one, so this is where Vacario should shine.

HOW THE WORKFLOW RUNS

Guests, suppliers, creators and merchants each follow the same five stages on their own track. They are welcomed and pointed to one first action. Anyone without a first result in 14 days gets reminders, then a personal call. Each month they receive something useful. Milestones are recognised and rewarded. Feedback is collected at key moments and detractors are called back. Anyone going quiet is flagged and contacted with a personal offer or a renewal conversation.

WORKED EXAMPLE: ONE PASS THROUGH THE WORKFLOW

A new homestay owner signs up and gets a welcome with one task: upload photos **(Join)**. By day 10 the listing is not live, so the account manager calls and finishes it with them **(Activate)**. Each month they get a statement with bookings and reviews **(Engage)**. At 100 nights sold they get a top-partner badge and featured placement **(Reward)**. When availability drops in the off-season they are flagged and invited into a monsoon promotion **(Retain)**.

Numbers in boxes are the steps on the workflow page that follows. People and places are illustrations.

HOW WE KNOW IT IS WORKING · FIRST FOUR KPIS, FULL FORMULA CARDS ON PAGES THAT FOLLOW

Activation rate ↑

Reached first result within 14 days ÷
Joined in the same period × 100

Time to first value ↓

Median days from joining to first result

90-day retention ↑

Still active at day 90 ÷ Joined in the
same month (cohort) × 100

Repeat booking rate ↑

Guests with 2+ bookings in 12 months ÷
Guests who booked in the same 12 months ×
100

RULES THAT KEEP IT WORKING

- ✓ One track per audience; nobody gets another audience’s messages.
- ✓ Every message has one clear next action.
- ✓ Detractors are contacted within 72 hours.
- ✓ Renewals start 60 days before the end date.

WHERE IT USUALLY BREAKS, AND WHAT TO DO

WARNING SIGN	WHAT TO DO
Many join, few activate	Shorten the path to the first result and call at day 10.
Partners leave without warning	Act on early signs (falling availability, no posts) from the weekly at-risk list.
Too many messages	Cap marketing messages; let triggered messages replace scheduled ones.

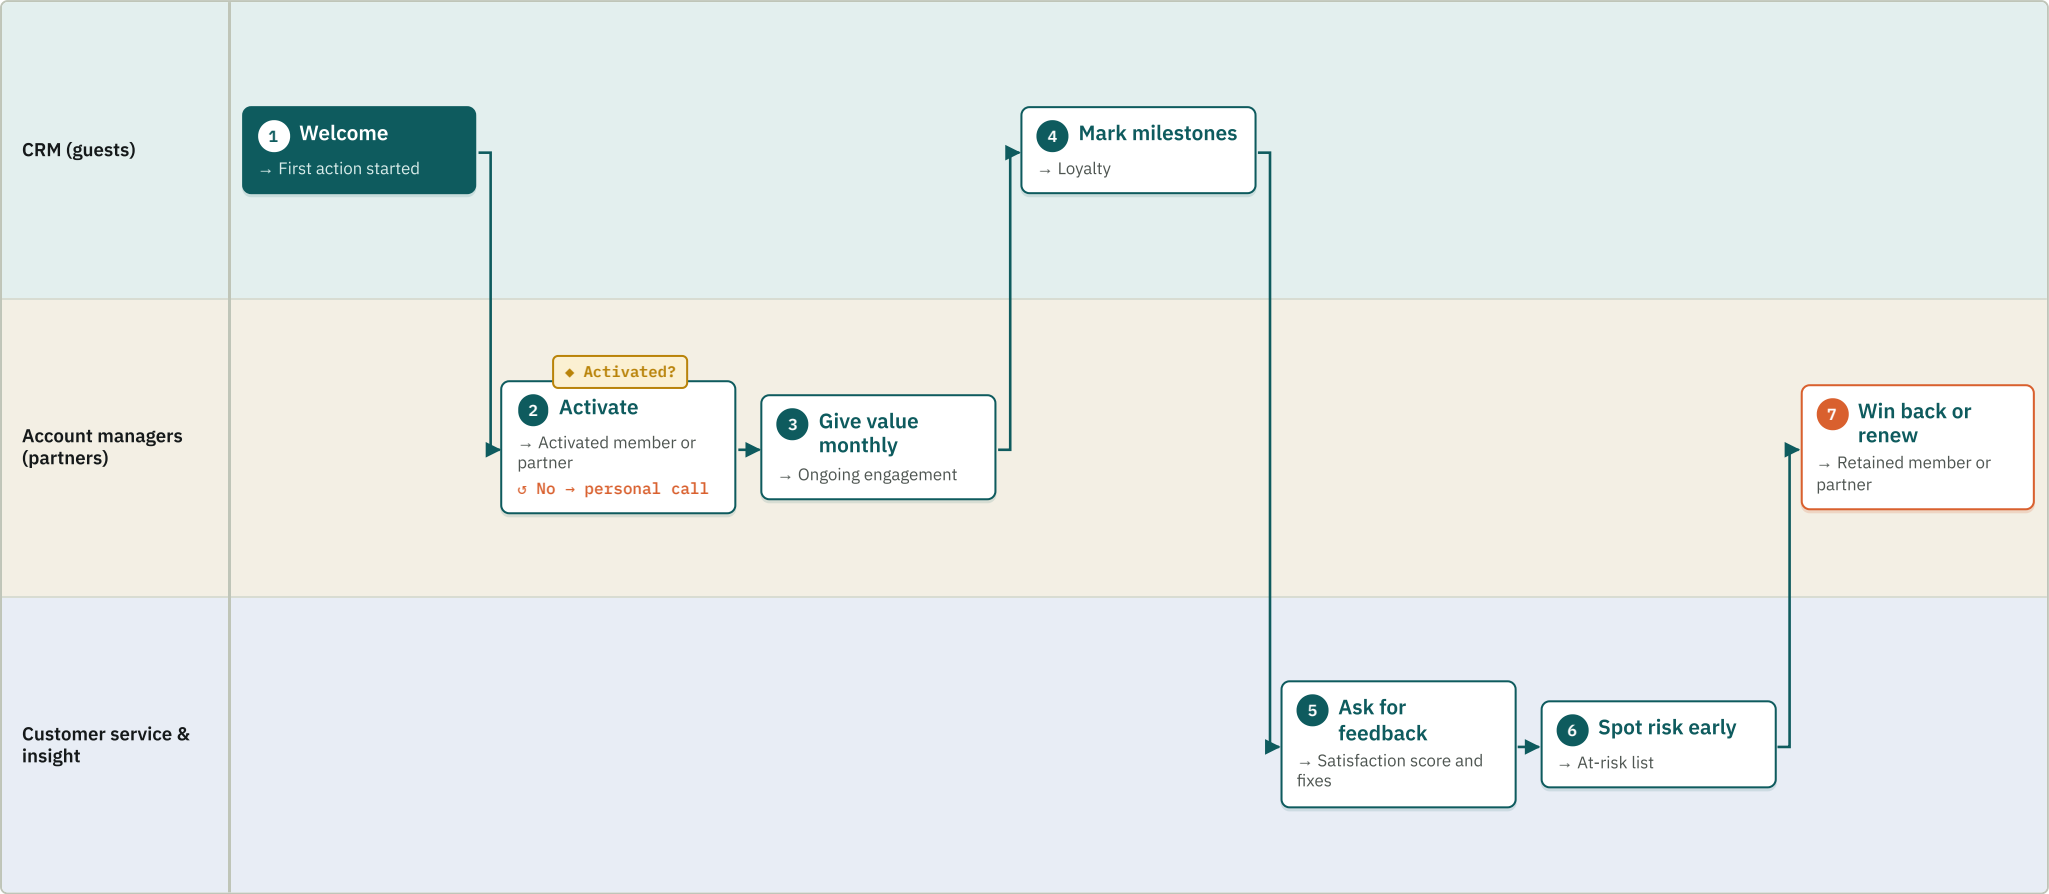

06

WORKFLOW
Lifecycle Communications

Directly tied to guest and partner retention. Communication should not stop once someone joins, spends, sells or sponsors. This is where Vacario should shine.

- GUESTS
- SUPPLIERS

- Always on: triggered messages
- Monthly: statements and value updates
- Quarterly: retention review by track

HANDS OFF TO

- **Consumer:** returning guests into campaigns
- **Internal:** retention numbers into performance reporting

06

STEP PLAN

Lifecycle Communications

Directly tied to guest and partner retention. Communication should not stop once someone joins, spends, sells or sponsors. This is where Vacario should shine.

- GUESTS
- SUPPLIERS
- CREATORS
- MERCHANTS & SPONSORS

STEP	WHAT HAPPENS	OWNER	STARTS WHEN	TIME ALLOWED	TOUCHPOINTS	OUTPUT
1	Welcome - One welcome track per audience - One clear next action - Set contact preferences	CRM (guests)	Sign-up or contract signed	Same day	Email, WhatsApp, in-app	First action started
2	Activate ♦ Activated? No → personal call - Guest: first booking - Supplier: listing live; creator: first post - Merchant: first redemption	Account managers (partners)	Days 1–14 with no first result	Reminder day 3, call day 10	Reminders, onboarding call	Activated member or partner
3	Give value monthly - Guests: trip ideas and member prices - Partners: performance statement - Creators: earnings and new briefs	Account managers (partners)	Monthly	By day 5 of month	Email, dashboard, WhatsApp	Ongoing engagement
4	Mark milestones - First trip, 5th booking 100th night sold, top-partner badge - Tier upgrades and rewards	CRM (guests)	Milestone reached	Within 24 h of milestone	Push, email, loyalty points	Loyalty
5	Ask for feedback - Short NPS question - Call every detractor - Share themes with product and supply	Customer service & insight	After trip; quarterly for partners	Close detractor loop in 72 h	Survey, NPS	Satisfaction score and fixes
6	Spot risk early - Guest: no visit in 60 days - Supplier: falling availability - Creator: no post in 45 days	Customer service & insight	Inactivity rules	Weekly at-risk list	Dashboard alerts	At-risk list
7	Win back or renew - Personal offer or call - Renewal review for sponsors - Exit reason logged if lost	Account managers (partners)	At-risk flag; 60 days before renewal	Contact within 7 days of flag	Offer, call, meeting	Retained member or partner

06

KPI SCORECARD

Lifecycle Communications

Directly tied to guest and partner retention. Communication should not stop once someone joins, spends, sells or sponsors. This is where Vacario should shine.

- GUESTS
- SUPPLIERS
- CREATORS
- MERCHANTS & SPONSORS

STAGES MEASURED, WITH THE CONVERSION KPI BETWEEN EACH

KPI	DEFINITION AND FORMULA	SOURCE	FREQUENCY	OWNER	TYPE	GOOD	TARGET
Activation rate	Reached first result within 14 days ÷ Joined in the same period × 100	CRM, partner tracker	Weekly	CRM / account managers	Leading	↑	-----
Time to first value	Median days from joining to first result	CRM, partner tracker	Monthly	CRM / account managers	Leading	↓	-----
90-day retention	Still active at day 90 ÷ Joined in the same month (cohort) × 100	Analytics	Monthly	CRM	Lagging	↑	-----
Repeat booking rate	Guests with 2+ bookings in 12 months ÷ Guests who booked in the same 12 months × 100	Booking system	Quarterly	CRM	Lagging	↑	-----
Partner churn	Partners lost in the period ÷ Partners active at the start of the period × 100	Partner tracker	Quarterly	Account managers	Lagging	↓	-----
Sponsor renewal rate	Sponsors who renewed ÷ Sponsors up for renewal × 100	Partner tracker	Quarterly	Account managers	Lagging	↑	-----
NPS by audience	% promoters (9-10) - % detractors (0-6)	Survey	Monthly	Customer service & insight	Lagging	↑	-----
Win-back rate	At-risk members who returned within 30 days ÷ At-risk members contacted × 100	CRM	Monthly	CRM	Leading	↑	-----
Loyalty share	Bookings by loyalty members ÷ All bookings × 100	Booking system	Monthly	CRM	Lagging	↑	-----

OBJECTIVES

- Keep guests booking again
- Keep suppliers, creators and sponsors active and renewing
- Make every message relevant to where the person is in their journey

REVIEW

- Always on: triggered messages
- Monthly: statements and value updates
- Quarterly: retention review by track

Set each target from the budget model before launch, then review it each quarter.

06

KPI FORMULAS · 1 OF 2

Lifecycle Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Activation rate

Leading ↑

The share of new guests or partners who reach their first result within 14 days: first booking, listing live, first post or first redemption.

FORMULA

$$\frac{\text{Reached first result within 14 days}}{\text{Joined in the same period}} \times 100$$

EXAMPLE

$$\frac{450}{1,800} \times 100 = 25\%$$

HOW TO READ IT

Measure each audience separately; the first results differ.

CRM, partner tracker · Weekly · CRM / account managers

Time to first value

Leading ↓

How long it takes a new member or partner to get their first result.

FORMULA

$$\text{Median days from joining to first result}$$

EXAMPLE

First results after 2, 4, 5, 9 and 13 days →
median = 5 days

HOW TO READ IT

The faster the first result, the more likely people stay.

CRM, partner tracker · Monthly · CRM / account managers

90-day retention

Lagging ↑

The share of people who joined in a month and are still active 90 days later.

FORMULA

$$\frac{\text{Still active at day 90}}{\text{Joined in the same month (cohort)}} \times 100$$

EXAMPLE

$$\frac{540}{1,800} \times 100 = 30\%$$

HOW TO READ IT

Compare cohorts month by month; this shows whether changes are working.

Analytics · Monthly · CRM

Repeat booking rate

Lagging ↑

The share of guests with two or more bookings in 12 months. The same measure as Consumer's 12-month repeat rate, owned jointly.

FORMULA

$$\frac{\text{Guests with 2+ bookings in 12 months}}{\text{Guests who booked in the same 12 months}} \times 100$$

EXAMPLE

$$\frac{240}{1,600} \times 100 = 15\%$$

HOW TO READ IT

The clearest sign that Lifecycle works.

Booking system · Quarterly · CRM

Partner churn

Lagging ↓

The share of suppliers or creators who left during the period.

FORMULA

$$\frac{\text{Partners lost in the period}}{\text{Partners active at the start of the period}} \times 100$$

EXAMPLE

$$\frac{12}{400} \times 100 = 3\%$$

HOW TO READ IT

Lower is better. Log every exit reason.

Partner tracker · Quarterly · Account managers

Sponsor renewal rate

Lagging ↑

The share of sponsors who renew.

FORMULA

$$\frac{\text{Sponsors who renewed}}{\text{Sponsors up for renewal}} \times 100$$

EXAMPLE

$$\frac{17}{20} \times 100 = 85\%$$

HOW TO READ IT

Start the renewal conversation 60 days early, with the results report.

Partner tracker · Quarterly · Account managers

06

KPI FORMULAS · 2 OF 2

Lifecycle Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

NPS by audience

Lagging ↑

How likely people are to recommend Vacario, on a 0–10 scale. Promoters answer 9–10, detractors 0–6.

FORMULA

$$\% \text{ promoters (9–10)} - \% \text{ detractors (0–6)}$$

EXAMPLE

200 answers: 110 promoters (55%), 60 passives, 30 detractors (15%) → 55 – 15 = **NPS +40**

HOW TO READ IT

NPS runs from –100 to +100. Call every detractor within 72 hours.

Survey · Monthly · Customer service & insight

Win-back rate

Leading ↑

The share of at-risk members who come back after being contacted.

FORMULA

$$\frac{\text{At-risk members who returned within 30 days}}{\text{At-risk members contacted}} \times 100$$

EXAMPLE

$$\frac{36}{300} \times 100 = \mathbf{12\%}$$

HOW TO READ IT

Test the offer and the channel; a personal message often beats a discount.

CRM · Monthly · CRM

Loyalty share

Lagging ↑

The share of bookings made by loyalty members.

FORMULA

$$\frac{\text{Bookings by loyalty members}}{\text{All bookings}} \times 100$$

EXAMPLE

$$\frac{180}{600} \times 100 = \mathbf{30\%}$$

HOW TO READ IT

Rising share means the programme is valued; check it is not only discounting.

Booking system · Monthly · CRM

07

EXPLAINED

Internal Communications

The systems and routines that keep the organisation aligned, informed, accountable and moving quickly across Canada, India, technology, operations, marketing and leadership.

- LEADERSHIP
- CANADA
- INDIA
- PHILIPPINES
- ALL FUNCTIONS

WHY THIS CHANNEL EXISTS

Internal communications keeps a team spread across Canada, India and the Philippines working from the same priorities and the same numbers. The plan’s rule: one company, one source of truth, one communications path from strategy to execution.

HOW THE WORKFLOW RUNS

Leadership sets priorities each month and records decisions. Finance turns them into approved budgets. Each week the management review checks progress against KPIs and assigns actions, and each function plans its week. Because the regions are hours apart, each ends its day with a handoff note so work continues overnight. Operations runs daily check-ins where needed. Finance publishes one dashboard every Monday. Everything is filed in the knowledge base, and incidents follow a set escalation path.

WORKED EXAMPLE: ONE PASS THROUGH THE WORKFLOW

At the monthly review, leadership decides to open Goa inventory first (1). Finance approves the extra supply budget in two days (2). Monday’s management review gives the Goa target to the supply lead (3), and the supply team plans its week (4). India’s evening handoff note tells Canada which contracts need sign-off (5). A payments outage at 2 am IST is logged as SEV 1 and the CEO is alerted within 15 minutes (9). Monday’s dashboard shows Goa listings rising (7), and the decision and post-mortem are filed (8).

Numbers in boxes are the steps on the workflow page that follows. People and places are illustrations.

HOW WE KNOW IT IS WORKING · FIRST FOUR KPIS, FULL FORMULA CARDS ON PAGES THAT FOLLOW

Decision log completeness ↑

Decisions recorded in the decision log ÷
Decisions made in reviews × 100

Action close rate ↑

Actions closed by the due date ÷ Actions
due × 100

Spend approval turnaround ↓

Median working days from request to
approval

Dashboard on time =

Weeks the dashboard was published by
Monday ÷ Weeks in the period × 100

RULES THAT KEEP IT WORKING

- ✓ If a decision is not in the decision log, it has not been made.
- ✓ Every action has one owner and a due date.
- ✓ One dashboard; nobody presents their own version of the numbers.
- ✓ SEV 1 incidents reach the CEO at once, at any hour.

WHERE IT USUALLY BREAKS, AND WHAT TO DO

WARNING SIGN	WHAT TO DO
Work waits overnight between regions	Handoff note every working day, with an owner for each open item.
Meetings end without decisions	Close every meeting by reading back decisions and owners.
Files scattered across inboxes	Nothing counts as shared until it is in the knowledge base.

07

- Corporate: staff briefed before external news
- All channels: priorities, budgets and one set of numbers

07

STEP PLAN

Internal Communications

The systems and routines that keep the organisation aligned, informed, accountable and moving quickly across Canada, India, technology, operations, marketing and leadership.

- LEADERSHIP
- CANADA
- INDIA
- PHILIPPINES
- ALL FUNCTIONS

STEP	WHAT HAPPENS	OWNER	STARTS WHEN	TIME ALLOWED	TOUCHPOINTS	OUTPUT
1	Set strategy & decisions - Priorities, major decisions, approvals - Investor and shareholder matters - Every decision written in the decision log	Executive team	Monthly strategic review	First week of month	Strategic review, decision log	Monthly priorities
2	Budgets & approvals - Budget per function against the model - Cash need and forecast - Spend approval limits	Finance	Priorities set	Approvals within 3 working days	Budget model, approval form	Approved function plans
3	Weekly management review - Each head: progress, blockers, KPIs - Decisions and owners recorded - Escalations reviewed	Executive team	Weekly	Monday, 45 min	Video call, dashboard	Actions with owners
4	Weekly functional meetings - Tech & product, supply, marketing & social - Finance, customer service, BD - Actions onto the shared task board	Function heads	Weekly	Tuesday–Wednesday	Team meetings, task board	Team work plans
5	Time-zone handoff - Handoff note: done, open, needs decision - Overlap call when needed - Owner named for every open item	Region leads	End of each region’s day	Every working day	Shared channel, template	No waiting overnight
6	Daily check-ins - Priorities and staffing - Customer-service and vendor issues - Compliance and admin	Operations	Daily	15 min where required	Stand-up	Issues assigned
7	Performance reporting - Users, bookings, engagement, conversion - Inventory, creator activity, revenue - Marketing results vs. budget	Finance	Weekly and monthly	Dashboard every Monday	Dashboard	One set of numbers
8	Knowledge base - Contracts, decks, brand assets, specs - SOPs, research, meeting notes - Decision log and policies	Operations	After every meeting or decision	Notes filed within 24 h	Knowledge base	One source of truth
9	Crisis & escalation ♦ SEV 1? Yes → CEO at once - Detect, log, set severity - Escalate, contain, communicate - Resolve and file post-mortem	Operations	Incident detected	SEV 1 acknowledged in 15 min	Escalation channel, phone	Contained, logged incident

07

KPI SCORECARD

Internal Communications

The systems and routines that keep the organisation aligned, informed, accountable and moving quickly across Canada, India, technology, operations, marketing and leadership.

LEADERSHIP

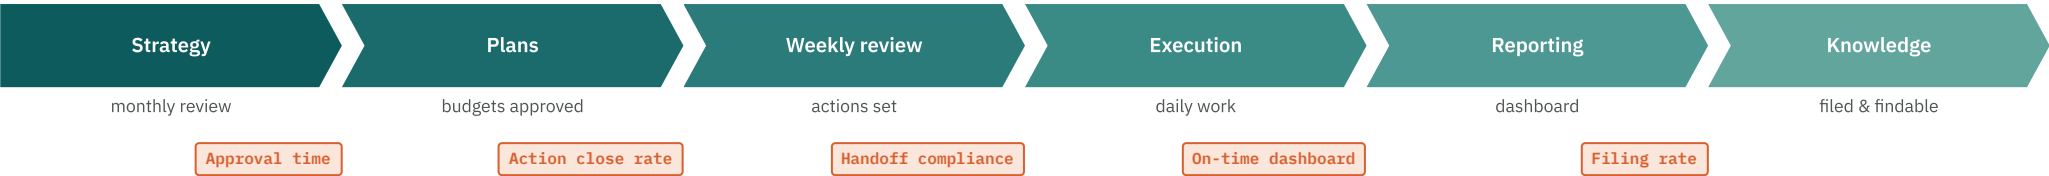

CANADA

INDIA

PHILIPPINES

ALL FUNCTIONS

STAGES MEASURED, WITH THE CONVERSION KPI BETWEEN EACH

KPI	DEFINITION AND FORMULA	SOURCE	FREQUENCY	OWNER	TYPE	GOOD	TARGET
Decision log completeness	Decisions recorded in the decision log ÷ Decisions made in reviews × 100	Decision log	Monthly	Executive team	Leading	↑	-----
Action close rate	Actions closed by the due date ÷ Actions due × 100	Task board	Weekly	Function heads	Leading	↑	-----
Spend approval turnaround	Median working days from request to approval	Approval form	Monthly	Finance	Leading	↓	-----
Dashboard on time	Weeks the dashboard was published by Monday ÷ Weeks in the period × 100	Dashboard	Monthly	Finance	Leading	=	-----
Handoff compliance	Handoff notes sent ÷ Region working days (3 regions × working days) × 100	Shared channel	Weekly	Region leads	Leading	↑	-----
SEV 1 response time	Minutes from detection to acknowledgement, for each SEV 1 incident	Incident log	Per incident	Operations	Leading	↓	-----
Time to resolve	Median hours from detection to resolution, per severity level	Incident log	Monthly	Operations	Lagging	↓	-----
Post-mortems filed	SEV 1-2 incidents with a post-mortem within 5 working days ÷ SEV 1-2 incidents × 100	Knowledge base	Monthly	Operations	Lagging	↑	-----
SOP freshness	SOPs reviewed in the last 6 months ÷ All SOPs × 100	Knowledge base	Quarterly	Operations	Lagging	↑	-----

OBJECTIVES

- Everyone works from the same priorities and numbers
- Decisions are made fast and written down
- Nothing waits overnight because of time zones

REVIEW

- Daily: operational check-ins where required
- Weekly: functional meetings and management review
- Monthly: strategic / business review

Set each target from the budget model before launch, then review it each quarter.

07

KPI FORMULAS · 1 OF 2

Internal Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Decision log completenessLeading ↑

Whether decisions made in reviews are written down.

FORMULA

$$\frac{\text{Decisions recorded in the decision log}}{\text{Decisions made in reviews}} \times 100$$

EXAMPLE

$$\frac{19}{20} \times 100 = 95\%$$

HOW TO READ IT

Read the log back at the end of each review to close the gap.

Decision log · Monthly · Executive team

Action close rateLeading ↑

The share of actions finished by their due date.

FORMULA

$$\frac{\text{Actions closed by the due date}}{\text{Actions due}} \times 100$$

EXAMPLE

$$\frac{68}{80} \times 100 = 85\%$$

HOW TO READ IT

Low rates usually mean too many actions per person; cut them.

Task board · Weekly · Function heads

Spend approval turnaroundLeading ↓

How fast spend requests are approved.

FORMULA

Median working days from request to approval

EXAMPLE

Approvals took 1, 1, 2, 3 and 6 days → median = 2 days

HOW TO READ IT

The SLA is 3 working days; slower approvals hold up campaigns and contracts.

Approval form · Monthly · Finance

Dashboard on timeLeading =

Whether the weekly dashboard comes out by Monday. Target 100%.

FORMULA

$$\frac{\text{Weeks the dashboard was published by Monday}}{\text{Weeks in the period}} \times 100$$

EXAMPLE

$$\frac{4}{4} \times 100 = 100\%$$

HOW TO READ IT

The management review uses it, so a late dashboard means a review without numbers.

Dashboard · Monthly · Finance

Handoff complianceLeading ↑

Whether each region sends its end-of-day handoff note.

FORMULA

$$\frac{\text{Handoff notes sent}}{\text{Region working days (3 regions \times working days)}} \times 100$$

EXAMPLE

$$\frac{62}{66} \times 100 = 93.9\%$$

HOW TO READ IT

Missing notes show up as work waiting overnight.

Shared channel · Weekly · Region leads

SEV 1 response timeLeading ↓

How fast a critical incident is acknowledged by its owner. Target 15 minutes or less.

FORMULA

Minutes from detection to acknowledgement, for each SEV 1 incident

EXAMPLE

Detected at 02:10, acknowledged at 02:21 → 11 minutes (within target)

HOW TO READ IT

Every miss is reviewed in the post-mortem.

Incident log · Per incident · Operations

07

KPI FORMULAS · 2 OF 2

Internal Communications

Examples use sample numbers to show the arithmetic.
They are not forecasts or targets.

Time to resolve

Lagging ↓

How long incidents take to fix, by severity.

FORMULA

Median hours from detection to resolution, per severity level

EXAMPLE

SEV 2 incidents resolved in 3, 5 and 9 hours → median = 5 hours

HOW TO READ IT

Track SEV 1 and SEV 2 separately; averages across levels hide problems.

Incident log · Monthly · Operations

Post-mortems filed

Lagging ↑

Whether lessons from serious incidents are written down.

FORMULA

SEV 1-2 incidents with a post-mortem within 5 working days
SEV 1-2 incidents × 100

EXAMPLE

$\frac{3}{4} \times 100 = 75\%$

HOW TO READ IT

A post-mortem names the cause and one change to stop a repeat.

Knowledge base · Monthly · Operations

SOP freshness

Lagging ↑

Whether procedures are kept up to date.

FORMULA

SOPs reviewed in the last 6 months
All SOPs × 100

EXAMPLE

$\frac{36}{45} \times 100 = 80\%$

HOW TO READ IT

Out-of-date SOPs are worse than none; review or retire them.

Knowledge base · Quarterly · Operations

07

INTERNAL · THE TWELVE STREAMS

What each internal stream covers

Every stream named in the plan, with where it happens, how often and who runs it.

STREAM	COVERS	WHERE IT HAPPENS	CADENCE	RUNS IT
Executive & leadership	Strategy, priorities, major decisions, budgets, approvals, investor and shareholder matters	Strategic review, decision log	Monthly	CEO
Cross-functional	Technology, product, inventory, marketing, social, finance, customer service, BD	Management review, task board	Weekly	COO / GM
Canada ↔ India ↔ Philippines	Reporting lines, decision authority, handoffs, time zones, escalation	Handoff notes, overlap call	Daily	Region leads
Product & technology	App progress, bugs, releases, API integrations, AI tools, testing, launch readiness	Tech meeting, release notes	Weekly + each release	Head of product
Sales & marketing	Campaign calendar, promotions, partnerships, influencers, earned media, content, results	Marketing meeting, calendar	Weekly	Marketing lead
Travel supply	Hotels, vacation properties, airlines, API suppliers, availability, pricing, contracting	Supply pipeline review	Weekly	Supply lead
Operational	Priorities, staffing, customer-service issues, vendors, compliance, admin	Daily check-in	Daily where required	Operations lead
Financial	Budgets, spend approvals, cash needs, forecasts, KPIs, department performance	Finance review, approval form	Weekly + monthly	Finance
Policies & procedures	Policies, brand standards, approvals, data and security, employee guidelines	Knowledge base	On change	Operations
Performance reporting	Users, bookings, engagement, conversion, inventory, creator activity, revenue, marketing	Dashboard	Weekly + monthly	Finance + analytics
Meeting structure	Daily check-ins, weekly functional, weekly management, monthly strategic	Shared calendar	As listed	COO / GM
Knowledge base	Contracts, decks, brand assets, specs, SOPs, research, notes, decisions	Central repository	After every meeting	Operations

INTERNAL • CRISIS & ESCALATION

Escalation path and time-zone handoffs

07

Defined procedures for technology outages, customer incidents, supplier problems, reputational issues, legal matters and urgent executive decisions.

SEVERITY	EXAMPLES	ACKNOWLEDGE	ESCALATE TO	WHO IS TOLD	UPDATE EVERY
SEV 1	App or payments down, travellers stranded, safety incident, legal threat, press story	15 min, any hour	CEO + function head at once	Affected customers and partners; media only through the spokesperson	30 min
SEV 2	Supplier overbooking, API sync failure, complaint going public on social	1 h, working hours	Function head, same day	Affected customers and partners	4 h
SEV 3	Single customer issue, minor bug, vendor delay	Next check-in	Team lead	The customer involved	Daily

HANDOFF CLOCK • UNTIL 31 OCT 2026 (CANADA ON EDT)

INDIA (IST)	CANADA EASTERN (EDT)	PHILIPPINES (PHT)	WHAT HAPPENS
9:30 am	12:00 am	12:00 pm	India and Philippines read Canada's handoff note
6:00 pm	8:30 am	8:30 pm	India → Canada handoff; overlap call if needed
3:30 am	6:00 pm	6:00 am	Canada closes with its handoff note

FROM 1 NOV 2026 (CANADA ON EST)

INDIA (IST)	CANADA EASTERN (EST)	PHILIPPINES (PHT)	WHAT HAPPENS
9:30 am	11:00 pm	12:00 pm	India and Philippines read Canada's handoff note
7:00 pm	8:30 am	9:30 pm	India → Canada handoff; overlap call if needed
4:30 am	6:00 pm	7:00 am	Canada closes with its handoff note

Assumes the Canada team works Eastern Time. India and the Philippines do not change clocks.
